

## INTRODUCTION

Our industry is one of the most rapidly changing industries in America. New techniques in manufacturing, modern color variations, synthetic materials, and new chemical treatments, have all contributed to the complex changes the industry is experiencing. Old methods of staining and shading as well as old finishing techniques, are being superseded by new methods which must cope with modern and varying standards.

**MOHAWK** is proud that, in the face of these changes, it has not only kept abreast but anticipated many of these changes. Our research department is constantly experimenting and testing new methods and devices. Recent developments have vastly improved Touch-Up Markers, Fillers, Epoxy Adhesives and a complete line of Kits and repair products for wood, leather and vinyl. Our Tone Finish® aerosol products have been an invaluable tool for the finisher. We have also done everything possible to keep up with regulatory issues. Glance through the hardware section, the most complete line of its kind, designed exclusively with the service technician in mind.

This catalog, which includes finishing and touch-up tips, as well as a complete listing of our products and hardware, is designed to assist the Technician as much as possible. We are confident that it will aid in selecting the proper materials as each item has a brief explanation.

With our modern laboratory facilities, we are in a position to formulate and furnish you with almost any desired item and any special shade or color. We are always ready to help with whatever finishing, patching or repairing difficulties you have. Write or e-mail us explaining your problems and we will do our utmost to assist you.

# ORDERING INFORMATION

## ORDERING INFORMATION & TERMS

### Payment in Advance Orders:

We accept Visa, MasterCard or American Express.

### Open Credit:

Open credit is extended to accounts that complete a credit application and are approved by our credit department. No open credit will be allowed without a signed, completed credit application and approval of the credit department. **Your order will be shipped promptly upon a favorable credit determination.** On open accounts, our terms are Net 30 Days from the date of shipment. Sales tax will be added where required unless a tax exempt certificate is on file. **There will be a charge of \$30.00 for all returned checks and the account will then be placed on prepaid terms only.**

### When Ordering:

Please state your customer number first. List all stock numbers, names of products, size container and quantity. This will help to insure prompt and accurate order processing.

### Minimum Order Quantity:

The minimum order accepted is \$85.00

### Shipping and Handling (Continental U.S. only):

All regular ground shipments, or (truck) shipments, will be covered by the following freight program.

ORDER VOLUME (Minimum order \$85.00)	SHIPPING AND HANDLING CHARGES
\$85.00 - \$699.99	Actual Freight & Hazmat
\$700 and up	Freight Free
UPS Collect & Consignee Bill	\$10.00 Handling Fee
FedEx Collect	\$10.00 Handling Fee

Free Freight does not include any additional carrier accessorial charges, i.e. lift gate or redelivery fees.

**All overnight and air shipments will incur actual freight and handling charges with any and all applicable HAZMAT charges.** All orders shipped Collect, or Consignee Billing will be subject to a \$10.00 handling charge.

### Shipping and Handling (Alaska & Hawaii):

Free freight is paid to the freight forwarder within the Continental U.S. on orders of \$700.00 and up. Orders below \$700.00 will be charged per the table above. The customer pays charges from the forwarder to their destination. **All overnight and air shipments will incur actual freight and handling charges with any and all applicable HAZMAT charges.**

### Backorder Policy:

Back ordered items will be shipped as soon as possible unless order states "Do not backorder".

### Shortage:

Claims of shortage of materials or products must be reported within 10 business days of receipt of the order. Any deduction without authorization will not be allowed and will be carried as a balance due.

### Damaged Goods:

Once received, we ask that you promptly inspect your order. Any damages to the cartons or packaging of your order that are visible upon receipt should be noted on the carrier's paperwork when signing for the delivery. All claims of visible and/or concealed damage (within the cartons) should be reported to Mohawk Finishing Products within 10 business days.

### Return Procedures:

We make every effort to accurately ship your orders and commit to quickly correcting any error that may occur. All customer service issues are handled by the Customer Service Department.

1. Please notify our Customer Service Department of any questions. Our customer service representatives will do everything possible to satisfy your needs.
2. In order to answer your questions and serve you better, please have a copy of your packing slip and/or invoice when you call.
3. If a return is necessary, the Customer Service Department will provide you a return material authorization (RMA) number. This number must be marked on 2 sides of the carton(s) to be returned. Any merchandise returned without an RMA number marked on the carton(s) will be refused. Product being returned must be shipped via UPS or FEDEX. The warehouse cannot accept anything sent via US mail.
4. We must be notified of any shipping error within 10 business days. We cannot accept returned products under any circumstances after 60 days. All returns are subject to inspection.
5. All returns are subject to a 25% restocking charge with the exception of defective product or Mohawk shipping error.

### Limited Warranty:

Mohawk Finishing Products shall not be liable for any injury, loss or damage arising out of the use or inability to use any item sold by us. Our only obligation in lieu of all warranties expressed or implied is to replace any item proved to be defective. The user must determine the suitability of the product for its intended use, and assumes all risk in connection therewith.

## OUR MISSION STATEMENT

*"Mohawk's policy is to consistently provide products and services at a level of quality that meets or exceeds the expectations of our customers."*

***We expect to be the standard of quality for our industry.***

## TONERS

### Ultra™ Classic Toner

Dye-based transparency with highest rating of light-fastness available for dyes.

- Excellent flow out
- No overspray
- Mar and alcohol resistant

Solve flow-out problems associated with aerosol lacquer touch-up! Ultra™ Classic Toners utilize a non-fading, non-bleeding dye to provide excellent clarity. Wood shades can be varied without imparting the “muddy” effect sometimes associated with pigment type toners. Net Wt. 13 oz.

*Custom color matching available. Minimum order is 3 dozen per color.*

## CLEARs

### Perfect Blend™

A premium blended nitrocellulose lacquer displaying excellent adhesion over waxed and polished surfaces and areas contaminated with silicone. Perfect Blend™ features a soft spray, low film build, and fine atomization resulting in virtually no overspray, little bounce, excellent flow, and strong ability to blend in with the surrounding surface. Net contents: 13.5 oz/400ml.

M102-0705	Dead Flat	5-8 Sheen
M102-0710	Flat	10-13 Sheen
M102-0720	Matte	19-23 Sheen
M102-0740	Satin	35-40 Sheen
M102-0760	Semi-Gloss	55-65 Sheen
M102-0780	Gloss	80 Sheen

### Tone Finish® Clears

Our best selling aerosol lacquer! Clear nitrocellulose based lacquers are recommended as topcoats for wood finishes. Net Wt. 13 oz.

M102-0420	Gloss
M102-0419	Semi-Gloss
M102-0422	Satin
M102-0421	Flat
M102-0485	Dead Flat 5 Sheen

### Ultra™ Flo Clears

Formulated with special resins and solvents to provide a finish film free of orange peel. Little or no overspray when used over spot repairs over an existing lacquer finish. Saves time, as the finish film will not require sanding or rubbing. Net Wt. 13 oz.

M102-0450	Gloss
M102-0451	Flat
M102-0452	Satin

### Ultra-Flo Ultra™ Bond Clear

Mohawk's Ultra-Flo Ultra™ Bond Clear topcoat is specially formulated to adhere to and flow out over hard to coat surfaces such as UV finishes, 2 component polyurethanes, polyesters, etc. Ultra-Flo Ultra™ Bond Clear topcoat has a unique blend of resins and solvents that provide superior adhesion and flow. Net Wt. 13 oz.

M102-0550	Gloss	80 Sheen
M102-0551	Semi-Gloss	60 Sheen
M102-0552	Satin	40 Sheen
M102-0553	Flat	25 Sheen

## CLEAR

### Water Clear Acrylic

Water clear protective coating for furniture, metal, paper and plastic products. Does not yellow with age. Resists rust, corrosion, tarnish on chrome, brass, aluminum. Net Wt. 13 oz.

M102-0426	Gloss
M102-0427	Satin
M102-0428	Flat

### Final Finish™

A non-yellowing, C.A.B./Acrylic finish. This quick drying, blush resistant finish works equally well for production or in-shop touch up and repair of most modern finishes. Net Wt. 13 oz.

M102-0490	Gloss
M102-0492	Satin
M102-0494	Flat

### Pre-Catalyzed Clears

Features excellent flow out for touch-up use. The dry film is very durable and adheres where other finishes will not. The product has been tested and approved for in-factory touch-up on catalyzed finishes. Net Wt. 13 oz.

- Excellent atomization
- Excellent adhesion
- Very good clarity and durability

M102-0410	Gloss
M102-0415	Semi-Gloss
M102-0412	Satin
M102-0416	Matte
M102-0411	Flat
M102-0414	Dead Flat

### Clear Spray Shellac

A clear coating for furniture, floors, inside drawers and food cabinets. Shellac has unusually good adhesion to hard-to-grip surfaces. Hold out is exceptional on wood, plywood, and plaster. Recommended for spot sealing knot holes, sap streaks, and refilled areas before refinishing. Can also be used as a barrier coat over a silicone-contaminated area. Net Wt. 12 oz.

M102-0475

### Flat Oil Finish

Designed for oil-walnut and teak finishes. Spray over spot repairs to reduce gloss so as to blend in with the sheen of the surrounding finish. Can be used to produce a simulated oil finish over a previously stained surface. Net Wt. 13 oz.

M102-0424

### Finisher's Choice™ Clears

A high solids aerosol lacquer that eliminates the need to mix bulk finishes for your small refinishing and restoration jobs. Net Wt. 13 oz.

- Higher solids
- Outstanding atomization
- Fast build
- Excellent bluish resistance
- Superior flow out

M102-0540	Gloss
M102-0541	Satin
M102-0542	Flat
M102-0543	Sanding Sealer

### Leather/Vinyl Finish™

A flexible and durable coating used to protect and blend in spot repairs on vinyl furniture. Net Wt. 13 oz.

M109-0629	Clear Gloss
M109-0630	Clear Satin
M109-0631	Clear Flat
M109-1000	White Vinyl

## COLORS

### C.A.B. Production Topcoat Clears

High solids, fast-building, water clear finish. Excellent flow, fast drying and bluish resistant. The best choice for use over whites and light color furniture. Net Wt. 13 oz.

M102-0480	Gloss
M102-0482	Satin

### C.A.B. Production Topcoat - White

C.A.B. Production Topcoat is a non-yellowing, white aerosol finish. Use in areas where white coverage is desired long-term. Excellent flow-out, fast-drying and good adhesion to most finishes. Net Wt. 13 oz.

M104-0202 White Gloss

## COLORS

### Finisher's Glaze™ Glazing Stain

A truly professional glaze in an aerosol. No lid to open. No messy stir stick. No spills. No messy applicator. Just shake and spray. This is a medium viscosity glaze formulated in the spirit of our Finisher's Glaze™ Glazing Stain to yield great workability, and yet the solvent system is so coatings compatible that you can topcoat within just minutes. The high pigment load assures the opacity you need for great coverage. Use this glaze for quick and easy touch-ups, finishing applications, refinishing, and expedient application on carvings and into corners. In short, use it for anything you can do with a bulk glaze...only faster. Nt. Wt. 13 oz.

- M114-0600 Assortment (Includes all colors)
- M114-0143 Raw Umber
- M114-0202 White
- M114-0224 Black
- M114-0384 Deep Mahogany
- M114-1435 Burnt Umber
- M114-1478 Van Dyke Brown
- M120-2040 High Volume Spray Head for Finisher's Glaze™ Glazing Stain (M114's)

### Break-A-Way™ Glaze

Break-A-Way™ Glaze is the perfect product to easily add heavy hang up and detail accent color to ornate fine cabinetry or woodworking. Break-A-Way™ Glaze is applied over a sanded sealer or finish coat and then allowed to dry to a chalky, powdered state that is easily removed with an abrasive pad. Break-A-Way™ Glaze must be topcoated with a clear finish.

- Spray applied
- Compatible with all Mohawk finishes including waterborne
- Superior hang and build compared to solvent glazes

- M155-0202 White
- M155-1435 Burnt Umber
- M155-1478 Van Dyke Brown

### Wiping Wood™ Stain Aerosol

Pigment wiping stains that create beautiful, grain-enhancing, fade-resistant wood tones. They can be used as stand alone stains or in conjunction with our other products to create professional finishes with rich depth of color. Spills are out of the question with Wiping Wood™ Stain Aerosols. No stain dribbles down the side of the container while stirring, just shake the can. Apply by spraying the stain to the surface of the wood and using a brush or a cloth to spread the color.

- M145-02056 Medium Walnut
- M145-14786 Van Dyke Brown
- M145-2026 White
- M145-2076 Medium Brown Walnut
- M145-2096 Extra Dark Walnut
- M145-2246 Black
- M145-2276 Dark Red Mahogany
- M145-2296 Brown Mahogany
- M145-2496 Perfect Brown
- M145-2736 Modern Mahogany
- M145-4086 Cherry
- M145-4156 Light Golden Oak
- M145-1200 12 Pack Assortment (includes all colors)

## AEROSOL TOUCH-UP TIPS

### Surface Preparation:

The surface being sprayed must be clean, dry and smooth. Lightly sand the repair area smooth with P800 waterproof sandpaper and Rub Cut™ Oil or Wool-Lube™ Rubbing Lubricant. Always wash the surface to be sprayed with Wax Wash™ Remover or Silicone Wash. It is important to remove all traces of wax, oil, and dirt from the spray area which may retard drying. Just before the spray finish is applied, wipe gently with a Tack Cloth to remove all traces of lint which can detract from the appearance of the finish.

### Finish Application:

There are a few basic rules to follow when applying the finish to achieve good results and avoid problems. For best results, all aerosol spraying should be done at room temperatures of 70° F. Shake the can vigorously up and down until the agitator balls inside are loose. Once the agitator balls are loose, swirl the can in a circular motion for one minute. This will blend all ingredients properly. Hold spray can 10 to 12 inches from area being finished.

### Safety Precautions:

Most aerosol paint and lacquer products are flammable. Never spray in basements or any room that has an open flame or gas fired appliances. Always spray in a well ventilated area for safety and health reasons. Aerosol products perform best when used within 12 months from date of purchase.

### Keep Your Aerosol Products Clean

After you have completed your work, turn the can upside down and depress the tip for a few seconds until only vapor appears. This will clean the spray head and dip tube. Wipe off all overspray from the head before you put the can away. Clogged sprayheads can be removed and soaked in lacquer thinner.

## COLORS

### Colored Lacquer Enamel

Opaque solid for interior use only. Fast drying, lacquer based enamel. Superior hiding power for producing opaque finishes. Net Wt. 13 oz. *Custom color matching available. Minimum order is 3 dozen per color.*

### Tone Finish® Clear Lacquer Sanding Sealer

One of the most versatile products used in furniture touch-up. Fills in and levels surface scratches and burn-in repairs. Fast drying, easy sanding, high solids for rapid build-up. Seals in stains prior to final topcoat of finish for faster build up. Net Wt. 13 oz.

M102-0423

### Pre-Catalyzed Sanding Sealer

Excels in flow-out, adhesion and hold-out. Fast-drying, resistant to yellowing. Leaves no halo on spot repairs. Recommended for use under Pre-Catalyzed Clears, Final Finish™ Clears and C.A.B. Production Topcoats. Net Wt. 13 oz.

M102-0413

### Heavy Bodied Sanding Sealer

Used to repair light scratches, packing marks and light indentations. Heavy Bodied Sanding Sealer contains additional fillers to perform the repair in less time. Net Wt. 13 oz.

- Ultra low sheen
- Higher solids, higher build
- Highly blush resistant

M102-0491

*Also available in Bulk - see page 46*

## SEALERS

### Tone Finish® Flat Easy Sanding Sealer

This low sheen sealer is recommended when working with flat or dead flat topcoats. Dries quickly and sands with ease. Net Wt. 13 oz.

M102-0484 Flat

### Finisher's Choice™ Sealer

A high solids aerosol lacquer that eliminates the need to mix bulk finishes for your small refinishing and restoration jobs. Net Wt. 13 oz.

- Higher solids
- Outstanding atomization
- Fast build
- Excellent blush resistance
- Superior flow out

M102-0543

## SEALERS

### E-Z Vinyl® Sealer

E-Z Vinyl® Sealer aerosol is the perfect choice for spot repairs on kitchen cabinetry, furniture or millwork where improved durability, moisture resistance, and adhesion are critical. E-Z Vinyl® Sealer aerosol is a water clear, quick build sealer that is manufactured at 35-degree sheen and is specifically designed for surface preparation under mid to higher sheen finishes. E-Z Vinyl® Sealer aerosol sprays with good atomization and flow and provides a flexible, moisture resistant surface when applied under all MOHAWK aerosol clear topcoats, especially the pre-catalyzed aerosol lacquers. Net Wt. 13 oz.

- 35 degree sheen
- Improved moisture resistance
- Non-Stearated formulation

M102-8000

## SPECIALTY

### Block-It™ Toner

Adjust color shades without having to strip and refinish. Block-It™ Toners will warm up or cool down the color of a finish. Use orange to warm up or neutralize green shade browns. Obtain browns by spraying Blue over Red. Blue or Green will cool down or neutralize a finish that is too red. Apply directly over existing finish. Net Wt. 13 oz.

- M103-7001 Blue  
M103-7002 Green  
M103-7003 Orange  
M103-7004 Transparent Orange

### Blender Flow-Out™

Smooths and levels a finish which may have orange peeled. Blends overspray with existing finish in spot repair work. Net Wt. 13 oz.

- M103-0419 Gloss  
M103-0176 Flat

### No Blush™ Plus Retarder

Humidity or cold weather can cause a finish to turn white (blush). No Blush™ Plus Retarder re-flows the finish and allows the trapped moisture to escape. Net Wt. 13 oz.

M103-0475

### Textured Touch-Up

Specifically formulated for the touch-up and repair of non-smooth finishes such as grained vinyl wrap. Quickly covers blemishes and imperfections. Use on R.T.A. furniture and cabinets, television and speaker cabinets. Net Wt. 13 oz.

- M103-2020 White  
M103-2240 Black

### Super Blush™ Retarder

Humidity or cold weather can cause a finish to turn white (blush). Super Blush™ Retarder is a highly effective blush remover aerosol designed for solving the most severe blushing problems. Net Wt. 13 oz.

M103-0476

### Primer Sealer for Wood

Primer coat for use under colored lacquer enamels. Insures good adhesion for the final topcoat. Primer Sealer is fast drying and easy sanding, resulting in a smooth base. Has excellent color strength. Net Wt. 13 oz.

- M104-0224 Black  
M103-0447 White

### No Blush™ Blender Flat

Designed specifically for lower sheen finishes. No Blush™ Blender Flat smooths and levels a finish with orange peel or light scratches. No Blush™ Blender Flat blends over spray with the existing finish on spot repair work for various non-gloss sheens. No Blush™ Blender Flat also works as a standard No Blush™ to remove trapped moisture without raising the sheen. Net Wt. 13 oz.

M103-0276

## SPECIALTY

### Danish Oil

A deep penetrating oil finish with the durability of urethane. Won't chip or peel away as the polymerized finish seals and hardens the wood. Net Wt. 12 oz.

M103-0650 Dark Walnut

### Silicone Dry Lubricant

Lubricates and prevents sticking of doors, drawers, locks, hinges, latches. Protects against corrosion and rust on tools, machinery, moving parts, conveyors, cutting blades. Prevents bunching and binding, speeds cutting, sewing and fabric flow in the textile industry. Unaffected by water, oil and most common solvents. Will not freeze, melt or flush off.

Net Wt. 11.5 oz.

M103-0177

### Burn-in Sealer

A clear protective coating sprayed over a "Burn-In Stick" repair to eliminate "bright spots" (halo). When a gloss, satin or flat finish is applied over Burn-in Sealer, the repaired area will blend in with the sheen of the surrounding finish without glossing up.

Net Wt. 13 oz.

M103-0467

### E-Z Slip™ Lubricant

Greaseless wood lubricant for drawers, doors, windows and any wood fixtures that tend to bind. Reduces friction, prevents wear, and helps to increase ease of moving parts. Does not contain silicone.

Net Wt. 13 oz.

M103-0477

### Metallic Aerosol

Opaque solid. Used on metal, wood, ceramics, picture frames and various other objects. For interior use only. Net Wt. 13 oz.

M104-0109 Antique Gold  
M104-0438 Rich Pale Gold  
M104-0439 Bright Gold  
M104-1542 Silver - B/A

### Spray Adhesive

Spray Adhesive offers a fast tack time, which enables general purpose bonding on a wide variety of substrates, high bond strength and may be used to create a temporary or permanent bond. It's unique formula prevents soak in of the adhesive on porous surfaces. Spray Adhesive does not contain methylene chloride and meets Federal and State VOC requirements. Net Wt. 13 oz.

M103-0195

### Lacquer for Brass

Will keep your brass and brass-plated metal surfaces brilliant.

- Keeps metal bright and new looking.
- Prevents tarnishing.
- Protects

It's a water clear, non-yellowing and durable coating. Adhesion to metal surfaces is excellent. Net Wt. 13 oz.

M103-0500

## CLEANERS

### Fabric Guard® Fabric Treatment

Stops oil and waterborne stains before they happen. Superior to silicone repellents - protects fabrics not only against waterborne stains but also those containing oil or grease. Recommended for virtually all types of fabrics. A freshly spilled liquid will "puddle up" and can be easily blotted away. ODS FREE. Net Wt. 11.5 oz.

M103-0200

## CLEANERS

### Upholstery / Fabric Cleaner

Cleans fabrics, rugs, clothing and other surfaces. Upholstery/Fabric Cleaner is effective on grease, tar, adhesive residue, crayon, lipstick and ink. High force spray helps to loosen stubborn stains. This cleaner dries fast and leaves no residue. Net Wt. 13 oz.

M103-3000

### Furniture Cleaner & Restorer

Maintains the original new look of oiled, walnut, teak and rosewood furniture. Instantly restores color as it cleans. Hides scratches. Net Wt. 13 oz.

M107-0179

### Vinyl-Plastic & Leather Cleaner

Easily cleans vinyl upholstery, leather, rubber, enamel, ceramics and chrome appliances. Not only cleans but also provides a protective film for subsequent recleaning. Also recommended for vinyl auto tops and upholstery. Net Wt. 15 oz.

M107-0479

### Wax Wash™ Remover

Removes wax, oil and foreign materials from most surfaces in one application. The presence of wax, oil or foreign materials can retard drying or cause defects in finishing topcoats. Prior to applying a new finish or repair, clean surface with Wax Wash™ Remover. Ideal for furniture, appliances, woodwork and other surfaces. Net Wt. 12 oz.

M107-0190

### Zipklean™ II Spot Remover

A versatile, effective spot cleaner for upholstery, rugs, and fabrics. Removes stubborn stains such as adhesive tape, tar, oil, grease, gum, and more. Fast acting, leaves no odor in the fabric after drying. Leaves no ring. Safe for most fabrics. Evaporates quickly. Net Wt. 13 oz.

M107-0465

## POLISHES

### Classic Care™ Polish

Cleans and polishes all types of furniture. Silicone free. Safe for all finishes. Net Wt. 14 oz.

M107-0444  
M107-0444IM Imprint

Available with Personalized Imprint - Your firm's name, address and phone number imprinted on label. Minimum 144. See Custom price List for details.

### Crystal & Glass Cleaner

Windows, mirrors, and crystal remain clean longer. Dries crystal clear in seconds without leaving a dirt catching film. Also used for cleaning refrigerators, stoves, chrome and other appliances. Net Wt. 15 oz.

M107-0485

### Lemon Oil Polish

Professional Lemon Oil Furniture Polish that beautifies all types of furniture, woodwork, paneling and cabinets. Chemically holds dust on dust mops and cloths, preventing it from resettling on the polished surface. Ideal for dust cloths and floor mops. Net Wt. 12 oz.

M107-0466

## POLISHES

### OZ® Polish

OZ® Polish now offers

- Antistatic agent for less dusting
- Ultraviolet light absorber to protect the color of the wood
- Lemon scent for a fresh, clean fragrance
- Extended evaporation rate meaning larger pieces can be polished with greater ease
- Lower VOC

The “all-in-one” furniture cream polish in an aerosol! Cleans - polishes - protects. It’s safe! It’s sure. It’s the easiest one step operation in the business. OZ® Polish is really polishing magic. Any smooth finish surface... furniture, tile, marble, cabinets fixtures, chrome, etc. You name it - it does it. Non-abrasive, greaseless, and quick drying. Net Wt. 13 oz.

# TOUCH UP ITEMS

## TOUCH UP MARKERS

### Pro-Mark® Marker

The Pro-Mark® capillary marker features excellent flow. Whether you need to touch-up 1 inch or 20 feet, the Pro-Mark® Marker does it the first time and every time. The colors are the most fade resistant, the most resistant to color shift from topcoating and have the best bleed resistance. The nib offers superior flow along with the durability needed to do all normal repair work. The nib remains usable for the life of the marker. Marks equally well with the edge, the bottom or the tip. Good adhesion to most surfaces and resistance to polishes are built into the Pro-Mark® Marker.

Custom color matching available with a minimum order of 36 per color.

## TOUCH UP MARKERS

### Background Markers

The Background Marker dispenses a thin, highly opaque, fast drying, low sheen film to replace background color over fills, glue lines, dark areas in raw wood, and other stains. Indispensable for touch up on MDF, particleboard, and other very absorbent substrates, which go dark with other types of markers. Color band on markers to aid in identifying correct colors.

#### Replacement Nibs

**M290-1001** Acrylic Chisel (12 per pack)  
**M290-1002** Acrylic Bullet (12 per pack)

### Industrial Markers

Instant drying on absorbent surfaces. Permanent ink. Special valve protects against accidental drying out. Ink reservoir in barrel makes this type of marker far more economical than felt tip capillary markers.

**M275-0101** Black

### Vinyl Marker

This valve type marker is designed for interior and exterior use on all rigid vinyl plastics such as PVC. Adheres where other markers fail. Fast drying, low solids, good hiding power, resistant to common household cleaners, including ammonia and alcohol. Tough and flexible.

**M284-1000** White Vinyl

Custom color matching available with a minimum order of 36 per color. See Mohawk Price List, for custom order procedure and pricing. (M283-)

#### Replacement Nibs

**M290-1001** Acrylic Chisel (12 per pack)  
**M290-1002** Acrylic Bullet (12 per pack)

### Ultra™ Bond Waterborne Clear Finish Marker

Mohawk Ultra™ Bond Waterborne Clear Finish Marker produces a durable, chemical resistant, water clear finish for use on flooring, cabinets, furniture and many other surfaces. Has excellent adhesion on most hard to adhere to finishes such as urethane, UV and aluminum oxide. Blends well into the surrounding area providing a nearly invisible repair. A truly multi-purpose topcoat for those small repairs and finishing needs. Low odor and fast drying.

**M292-0020** Matte  
**M292-0040** Satin  
**M292-0060** Semi-Gloss  
**M292-0080** Gloss

# TOUCH UP ITEMS

## TOUCH UP MARKERS

### Ultra™ Fine Grainer

The best choice for replacing grain and distressing marks over spot repairs on all types of furniture and cabinets.

- Produces extra fine grain lines
- Quick drying permanent inks
- New nib design with continuous flow
- Easier than brush application
- Top coat with any Mohawk finish

M265-0101	Light Oak GP9
M265-0301	Medium Brown GP8
M265-0401	Dark Brown GP7
M265-0501	Black GP6

### Graining Pencils

Now softer - easier transfer. Used to replace grain or color on finished and unfinished surfaces. Especially designed for printed photographic finishes. Recommended on production line touch-up stations since color can be replaced along moving line. Absence of liquid eliminates drying time. Final coating can be applied without interruption of production lines.

M270-0941	Light Umber
M270-0943	Burnt Ochre
M270-0945	Brown Sienna
M270-0946	Dark Brown
M270-0947	Dark Umber
M270-0948	Sepia
M270-0997	Beige
M270-1034	Goldenrod (Oak)
M270-4030	Raspberry (Mahogany)

### Shading Pencils

Employed for antique distress markings and to simulate grain effects on spot repair work. Paper wrapped with string pull out making sharpening unnecessary. A protective coating should be sprayed over the area.

M271-0001	Black
M271-0002	Brown
M271-0005	Red Brown

## BLEND-ITS

### Blend-Its

A clear liquid filler and topcoat used to repair minor surface scratches, replace finish and to lock in other types of repair work. Adheres to most materials or finishes. Fast drying Blend-Its can be used on all finishes without fear of damaging the finish. Each jar comes with a brush attached to the cap for quick and easy application. 1/2 oz. jars.

M450-0001	Clear Gloss
M450-0002	Clear Satin
M450-0003	Clear Flat
M450-0005	Water Clear Gloss

## BURN-IN PRODUCTS

### Edging/Low Heat Sticks

Replaces color on worn-through edges, legs, and tops with a few strokes. Can be melted with burn-in knife to fill shallow defects. Topcoat with any finish. Size 3" x 5/8" x 5/8"

*Custom color matching available with a minimum order of 48 per color.*

### Quick Fill™ Burn-In Stick

Quick Fill™ is an innovative Burn-In Stick that makes filling defects quick and easy. Designed to fill nicks, dents, and scratches, it's the perfect filler for cabinetry, vinyl wrapped products and photo processed laminates. Quick Fill™ is applied using a simple heat source and leveled without the use of burn-in knives or sandpaper.

- Low sheen
- Quick and simple application
- Perfect for production workers, field service technicians and cabinet installers

Custom color matching available with a minimum order of 72 per color.

## BURN-IN PRODUCTS

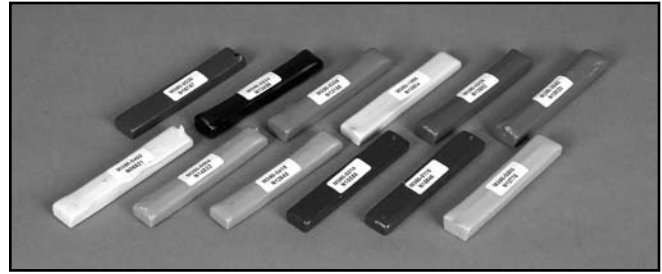

### PlaneStick® Burn-In Stick

The PlaneStick® Burn-in Stick is a dynamic new version of the old, conventional burn-in stick. This is the first truly new and exciting innovation in the touch up industry in many years. The PlaneStick® burn-in stick offers a number of advantages including:

- “Flat” sheen
- No gloss up when top coated with satin or flat finishes
- Repairs stay in place on virtually any surface
- Hard but not brittle. Will never shatter
- Fast and easy to level
- Great for hardwood floors
- Excellent for plastic laminates

Length is 3-1/2"

Custom color matching available with a minimum order of 144 per color.

### Burn-In Balm™ Paste

Prevents unwanted spread of excess E-Z Flow™ Stick or Plane Stick® Burn-In Sticks from adhering to the surrounding area as they are removed. Speeds production and minimizes sanding.

**M401-1203** 4 oz.  
**M401-1206** Quart

### Burn-In Sealer

A clear protective coating sprayed over a “Burn-In Stick” repair to eliminate “bright spots” (halo). When a gloss, satin or flat finish is applied over Burn-In Sealer, the repaired area will blend in with the sheen of the surrounding finish without glossing up. Net Wt. 13 oz.

**M103-0467**

### E-Z Seal™ Pen

Prevents glossy look of burn-ins under low sheen topcoats. Good solvent hold out. Fast drying and easy to use.

**M295-0001**  
**M264-1004** Replacement Nibs

## PUTTY & FILLERS

### Epoxy Putty Stick

Mohawk's Wood Epoxy Putty Stick enables you to restore, rebuild and repair all kinds of wood and other hard surfaces. 2 oz.

- Easy to use, 3 - 10 minute workable time and versatile
- Makes durable, permanent repairs
- Fast curing, hardens in 20 - 30 minutes
- No shrinkage - molds to any shape
- May be sanded, drilled, stained or painted
- Adheres well to wood, metal, glass and ceramic

#### Worklife 8 1/2 to 10 Minutes - Hardening 30 Minutes

M743-1500 Beige  
M743-1520 White

#### Worklife 3-6 Minutes - Hardening 20 Minutes

M743-1510 Pine  
M743-1530 Oak / Light Walnut  
M743-1540 Mahogany  
M743-1550 Cherry  
M743-1560 Walnut  
M743-1570 Black

M743-1580 Natural Maple  
M743-1585 Natural Cherry  
M743-1590 Raw Umber

M743-1200 12 Pack Assortment

### Epoxy Putty - 5 Minute

Bonds To: Plastic, Fiberglass, Brass, Nylon, Aluminum, Glass and Wood. Large defects can be filled with Mohawk's 5 Minute Epoxy Putty without the need of any special tools like heating irons, alcohol torches, or knife ovens. The two part Epoxy Putty consist of a Resin and Hardener which are mixed in equal parts. This mixture dries in five minutes and is non-shrinking. Excellent for filling large holes, broken corners, etc. 13 oz. Unit.

M743-2003 Tan  
M743-2005 Natural

### Plastic Filler with Hardener

An all purpose, two-part putty that is waterproof and non-shrinking. Repairs cracks, fills holes, patches and seals most surfaces on wood, metal, sheet rock, and plastic. Hardens to a natural wood shade and can be color tinted with Mohawk's Blendal® Powders before adding the cream hardener.

M743-5006 Quart-Filler w/Hardener  
M743-5007 Gallon-Filler w/Hardener  
M743-5001 Cream Hardener only (1 oz. tube)

### Color Fil™ Putty

Easy to use putty for filling and coloring nail holes and open edges. Can be finger applied or used with a flexible spatula. Topcoating with any clear finish will make the repair more durable. Net Wt. 1 lb. *Custom color matching available. Minimum order is 180 jars.*

M744-0395 Light Birch  
M744-0404 Fruitwood  
M744-0408 Cherry  
M744-0411 Nutmeg

### Grain Filler & Solvent

For all types of open grain wood to fill and level the surface. Mohawk Grain Filler is a heavy paste high in solids for improved fill properties. Easy to apply and provides excellent adhesion for finish coats. May be finished with lacquer, varnish, acrylic, or shellac finishes. Drying time is critical (see label). Too little dry time may cause poor adhesion. Adjust dry time by diluting with Mohawk Grain Filler Solvent.

## PUTTY & FILLERS

### Patchal™ Putty

Patchal™ Putty is simply the best finish putty that you will ever use. Patch™ Putty is designed to be used on finished wood to fill nail holes, miter joints and cabinet seams. This putty is great for picture frames, trim and molding.

- Fast and easy application
- Simple clean up
- Can be top coated within minutes
- Superior color selection matched to current industry trends
- Easy to open packaging keeps putty fresh
- Color labels on the lids make it easy to find the right color

Net contents 4 oz.

*Custom color matching is available with a minimum order of 36 per color.*

### Wood Repair & Solvent

Synthetic wood filler.

- Sands like wood
- Stains like wood
- Looks like wood

A high quality wood filler that is uniform and readily workable. Fills cracks, gouges, knotholes, nail holes, and other defects in wood. Wood

Repair is waterproof and may be used indoors or outdoors. Wood Repair can be used on furniture, paneling, plywood, woodwork and other applications that require a filler. Can be stained.

## PUTTY & FILLERS

### Fil-O-Wood™ Wood Putty

Extra fine textured, water-base wood putty for holes, corner chips, cracks, screw holes and other defects. Will accept stain or finish in a manner similar to natural wood surrounding the defect. No strong solvents. Will not harm existing finish, can be sanded dry or wet. Once dry, Fil-O-Wood™ Wood Putty is shrink free, mar resistant, and has excellent adhesion. Recommended for both finishing and touch up repair systems where time is not of the essence or where hole is too large for filling with a Mohawk Burn-in Stick. Blendal® Powders can be intermixed with Fil-O-Wood™ Wood Putty to achieve additional shades. Can be sawed, drilled or carved.

### HOW TO REFILL DEFECTS WITH E-Z FLOW™ STICK, ELECTRIC KNIFE AND WOOL-LUBE™ RUBBING LUBRICANT

The following instructions describe how to touch-up and repair the most common damages to furniture.

#### PROCEDURE:

- Damaged area must be clean and free of dirt. Use a blade or sandpaper to remove any loose fibers.
- Choose the closest color E-Z Flow™ Stick. Melt enough E-Z Flow™ Stick on the hot blade of the Burn-in Knife to slightly overfill the damage. Fig. 1
- Allow the melted stick material to flow into the damage, overfilling slightly. Fig. 2
- Wipe any excess carefully from the blade with a clean cloth. Fig. 3
- Apply Burn-In Balm™ paste generously to the area surrounding the repair. Fig. 4 & 5
- Use the hot knife blade to level the E-Z Flow™ Stick fill. Fig. 6
- Wipe blade clean between passes. Fig. 7
- When fill is very close to level with surrounding surface, wipe the balm from the repair area.
- Wrap P1200 waterproof sandpaper around a rubber sanding block. Apply liquid Wool-Lube™ Rubbing Lubricant to the paper and lightly sand the fill until completely level. Fig. 8 & 9
- Wipe the area dry and apply a seal directly over the burn-in fill using an E-Z Seal™ pen. Allow to dry 4-5minutes.
- Sand very lightly with P800 waterproof sandpaper (Dry). Use without lubricant.
- Apply a coat of aerosol Clear Sanding Sealer and let dry.
- Sand lightly and remove dust.
- Apply grain using Graining Pen of the proper color.
- Apply the correct sheen of clear aerosol finish (Clear Toner, Ultra™ Classic Toner, Pre-Catalyzed Aerosol Lacquer or Finisher's Choice™ Lacquer).

## COLOR REPLACEMENT

### Blendal® Sticks (Patent Pending)

Mohawk Blendal® Sticks (Patent Pending) are used to add or alter color when repairing and touching up wood. This product allows quick color replacement on raw or finished edges and flat surfaces. You can easily blend the colors to accomplish a perfect match. Sharpener included in each assortment.

Custom color matching is available with a minimum of 36.

### BLENDAL® STICK – COLOR BLENDING (PATENT PENDING)

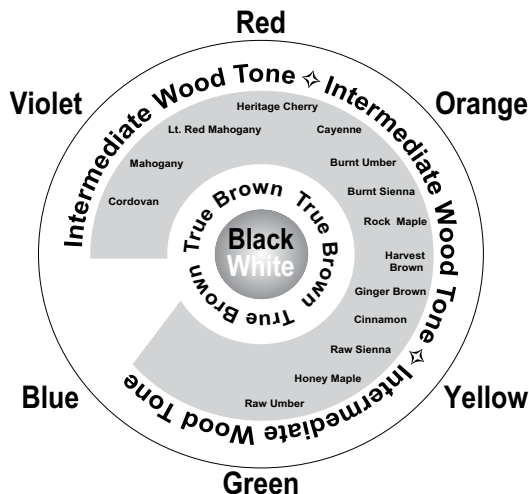

Matching colors for touch up requires a basic understanding of color theory. Normally, it will be necessary to blend 2 or 3 colors together to get an accurate color match. The normal wood panel has a color scheme consisting of a foreground, background, and grain color. The following is a list of intermediate wood tone colors; these are the primary colors of the wood industry:

- Cordovan - Violet Brown
- Burnt Umber - Red Brown
- Burnt Sienna - Orange Brown
- Raw Sienna - Yellow Brown
- Raw Umber - Green Brown
- True Brown - Neutral Brown

There are two basic techniques to replace color; color blending and color layering. When color blending simply draw several streaks of various colors (use colors matching background, foreground and grain colors) then lightly blend colors together to create a natural wood grain pattern. When color layering simply draw streaks of the background, smear color lightly then topcoat with a clear aerosol. Repeat this process with a foreground color and then a grain color each time duplicating the color and grain pattern.

Colors that appear opposite each other on the color wheel will neutralize each other and bring the resulting color to the middle of the wheel, which is a neutral brown.

### Color Theory

**Note: Colors directly across from each other are complementary colors and when blended together will develop a "brown tone".**

**Black and White are used to darken or lighten colors and are not considered true colors.**

# COLOR REPLACEMENT

## COLOR REPLACEMENT

### Blendal® Powder Stain (Pigment Type)

Extra fine ground touch-up pigment colors used for spot color replacement on all types of furniture, cabinets, plastics, leather, vinyl and in hundreds of other finishing applications. Best results are obtained when applied with Lacover® Padding Finish. Compatible with various other padding agents, "French Polish," lacquer, shellac, varnish, synthetic finishes and Graining Liquid. Apply with a "padding pad" or brush. Sold by volume measure. Custom color matching available with a minimum order of 32 oz. per color.

### Bronzing Powder

Concentrated lining grade bronzing colors free of fillers and extenders. Used to decorate picture frames, furniture, lamps, antique objects and many other items. Raised portions of a frame can be burnished to a higher luster thus creating a contrast with the rest of the work. Packaged by volume.

#### HOW TO APPLY STAIN AND FINISH IN ONE OPERATION

- Disperse Lacover® Padding Finish throughout the pad by tapping pad into the open palm of the hand. This will avoid a wet spot in the pad and will help produce an even flow during application.
- Before padding over the bare spot, select Blendal® Powder Stain color that matches the shade of the surrounding finish. Apply Blendal® Powder Stain to index finger of the other hand.
- Using a light stroke, pad several times over bare spot with Lacover® Padding Finish.
- As soon as the last stroke is completed, immediately apply the stain with your fingertip to the unstained or damaged spot, rubbing lightly with the grain.
- Once the stain has been applied, continue finishing operation by padding a light coat of Lacover® Padding Finish over re-stained spot. Use as light a stroke as possible following stain application. If stain "shifts" or does not "hold" in the repaired area, the pad is too wet with Lacover® Padding Finish or you are using too much pressure.
- If stain is light in color, repeat this operation until desired shade is attained. In many cases you will have to use 2 to 4 different shades of Blendal® Powder Stain to accomplish a perfect match. For example, start with a shade or two lighter than original finish and apply a darker shade over the light shade. This procedure will produce a better match. If the results are unsatisfactory, the repaired area can be washed off with Lacosolvent™ Reducer and the entire procedure repeated without fear of damage to the surrounding area. Spray a protective coat of Tone Finish® Lacquer of the proper sheen or pad with Lacover® Padding Finish.

## COLOR REPLACEMENT

### Match-All™ Stain and Grain System

The perfect match for staining and graining. The materials contained in this system are specially designed to enable you to quickly and accurately replace background and grain colors on damaged furniture and cabinets. Any color in wood tones can be matched from staining and graining colors. The color guide brings you to a close match quickly and easily. This Match-All™ System makes the job easier for all levels from novice to pro repair technician.

#### M881-4600 Complete Match-All™ Stain and Grain System

M462-2010 Color A	M462-2030 Color C
M462-2020 Color B	M462-2040 Color D

### STAINING WITH MATCH-ALL™ STAIN

To replace background color on wear through areas, over burn-in and other types of fills, the following steps are recommended:

1. Be sure the area to be colored is clean and free of wax, oil and other contaminants by wiping with Mohawk Wax Wash™ Remover.
2. Remove the Match-All™ Tinting Guide from the kit and choose the color card that is closest to the background color surrounding the repair area.
3. Read the formula listed on that color card. Remove the Match-All™ Staining liquid colors listed on the formula from the kit box.
4. Shake each jar of Match-All™ Stain vigorously to assure proper blending and open the jars.
5. Locate the Match-All™ Tinting Loop contained in the kit and the Match-All™ Tinting Glass mixing surface. Following the formula on the color card, carefully measure the number of drops of each color and place them on to the mixing glass. (A drop is a full loop on the measuring tool.) Release the drop from the loop by tapping it on the glass. Clean the loop as you move from color to color using the Match-All™ Brush Cleaner and a soft cloth to avoid contaminating the staining colors.
6. When all required drops are in the mixing glass, blend them together using the short bristled Staining Brush provided in the kit.
7. Wipe excess stain from the brush with a cloth or by brushing on a separate surface. Test the color on the damaged surface by using a small brush area. If the color needs adjustment, it can be tinted with any of the Match-All™ Stains. If a full drop is not required, a partial drop (or tint drop) can be obtained by dipping only the edge of the measuring loop into the stain and tapping it next to your color blend. Mix and retest the color. You may want to record your formula and suite #/ Manufacturer's Code on the back of the color card for future reference.
8. Brush the correct color onto the repair area and feather the edges. Let dry 3-4 minutes.

**NOTE:** If a stain is setting too quickly or has thickened on the mixing surface, add a drop of stain retarder to the blend mix. Color intensity may be reduced using the Match-All™ Clear Base provided in the kit. Using the Clear Base reduces color strength without reducing stain solids.

### GRAINING WITH MATCH-ALL™ GRAINING LIQUID

Grain lines can be replaced using the Match-All™ Graining Liquid and the long bristled Graining Brush provided in the kit box. The Match-All™ Graining Liquid Colors can be used straight, if one of the colors matches, or they can be blended with other Graining Liquid Colors. Follow these steps for application:

1. Place the clean Match-All™ Tinting Glass over the repair.
2. Choose the Match-All™ Graining Liquid that you believe to be the closest and place a drop onto the glass mixing surface.
3. Spread a thin line on the glass, observe the color compared to the surrounding grain.
4. If the color matches, carefully brush grain color over the repair, duplicating natural grain in the area. If the color does not match, blend colors and recheck.
5. After allowing repair 3-5 minutes to dry, apply a light coat of Mohawk aerosol sanding sealer and allow to dry.
6. Apply a light coat of the correct sheen aerosol clear finish, such as Ultra™ Classic Toner or any of the Mohawk clear toners.

**NOTE:** Be sure the measuring tool and brushes are cleaned and all jar lids are tightly closed before returning to the kit box.

# COLOR REPLACEMENT

## LIQUID TOUCH-UP

### Two Minute Touch-Up™ Brushing Liquid & Solvent

A brushing type clear liquid used with Blendal® Powder Stains for spot brush touch-up and coloring edges. Stays wet on the brush, dries in minutes on the repaired surface. A must in every finisher's kit for use in areas where the "padding" method is not practical. To lay the color flat without build up use with Two Minute Touch-Up™ Solvent. Available in quarts.

M440-0006 Brushing Liquid  
M441-0006 Solvent

### Finish Up™ Polyurethane

LOW VOC 380 g/l

A user friendly wipe on finish. Finish Up™ Polyurethane can be applied over repairs such as Burn-ins, Fil-Stik® Putty Stick fills, Blendal™ Powders and Touch Up Markers to seal in the repair, leaving a durable protective finish. Can be applied over properly cleaned existing finishes to improve appearance and durability. Finish Up™ Polyurethane adheres well to most types of lacquers, vinyl clads, high pressure laminates as well as many other substrates. Best of all, it is water based and has almost no odor. This feature makes Finish Up™ Polyurethane the product of choice where aerosols and other solvent based touch up finishes are not appropriate.

- Easy wipe on application
- Good flow characteristics
- Moisture & alcohol resistant
- Excellent adhesion
- Will not lift other finishes
- Quick drying
- Good durability
- Water clear
- Low VOC
- Nonflammable

M603-4405	M603-4406	Flat

### Graining Liquid

Balanced clear liquid formula for applying grain or base color in spot repair work. Unlike regular "padding agents", Graining Liquid stays wet on the brush longer. This feature allows the user more time to complete a repair. Mix with Blendal® Powder colors on any non-absorbent surface. Apply grain with style 149 or 50 brush.

M403-0004 4 oz.  
M403-0006 Quart

## PADDING FINISHES

### Wil Pro™ Padding Finish

The choice of the experts. One of our most popular French finishes. Super-fast dry. May be coated with lacquer immediately. Lowest build-up of any French finish on the market. The best finish for French polishing. Use with Blendal® Powder Stains. Excellent where clarity and minimum build-up are critical. Ready to use; no oil or additives are required. Very print resistant. Used for removing packing marks and mars on fine furniture. May be used on the very lightest of finishes with no discoloration. Formulated especially for the professional touch-up artist. Quart

M405-2006

### Lac French™ Padding Finish Light Amber

The yardstick by which all other French padding finishes are measured. Used by thousands of repair technicians for many years. May be coated with lacquer immediately. Lac French™ Padding Finish is a very light amber color, suitable for use on the lightest of finishes. Ready to use. No oil or any other additives required. A formula perfected over the years for just the right build-up. Dries harder than any other french padding finishes on the market. Use with Blendal® Powder Stains. For best results, use trace cloth for application. Quart

M405-2506

## PADDING FINISHES

### Rapid Pad® Padding Finish

Repairs packing marks or extensive scratches (where a whole surface needs repair) "French Polish" padding finish applied over an original finish for restoration, rejuvenation, protection, and repair of surface finish defects. Formulated to flow freely while "padding" out an entire surface.

Most recent formula improvements have increased durability, mar and blush resistance.

- RESTORATION - makes worn furniture look factory new again.
- REJUVENATION - add new life to old finishes, antiques, etc.
- PROTECTION - new hard finish resists mar and abrasion
- FINISH DEFECTS - eliminates surface scratches and packing marks.

M420-0006    Quart  
M420-0007    Gallon

### Lacover® Padding Finish

For spot refinishing. The most widely used "French Polish" padding finish in the world. Specially formulated for use with Mohawk Blendal® Powder Stains. Compatible with most known finishes. In one operation, the stain and finish can be replaced on worn or bare spots. Also recommended for leather and vinyl. "Highlight" effects can be created on wood, leather or vinyl materials with this method. Lacover® Padding Finish imparts new life to leather, prevents cracking and drying out. Available in two solids. The higher the solid, the less time consumed to build up the finish to complete the job.

QUART	GALLON	SOLID

M405-5006	M405-5007	Highest

# PADDING FINISHES

### Lacosolvent™ Reducer

Reducer for Lacover® Padding Finish and Rapid Pad® Padding Finish. Should be used to remove an improperly padded repair without fear of injury to surrounding finish. Can also be used to wash down the finish prior to "spot padding" repairs.

M406-0006    Quart  
M406-0007    Gallon

### Amalgamator & Solvent

Repairs white rings caused by water or alcohol. Penetrating "padding agent" used to eliminate alcohol rings and heal checked or crazed finishes (alligator marks). Once the defect has been eliminated, it is recommended to apply Rapid Pad® Padding Finish over the entire surface to seal the Amalgamator.

M400-0006    Quart  
M400-0007    Gallon

AMALGAMATOR SOLVENT: A special prepared reducer for Amalgamator. Recommended as a cleaner prior to padding a finish. Will not harm the original finish.

M650-0036    Quart Amalgamator Solvent

#### HOW TO REMOVE CHECK MARKS AND WHITE RINGS CAUSED BY WATER OR ALCOHOL WITH AMALGAMATOR

Since these defects are below the surface of the original finish, we must use a penetrating padding agent. Mohawk's penetrating padding agent is known as Amalgamator. This product will be absorbed by the damaged finish and draw together the separation known as checked or crazed marks. Once the separations have been reflowed, they will remain healed due to the plasticizing agent in Amalgamator. This product is effective on conventional type finishes. Catalyzed finishes have a resistance to solvents, thus Amalgamator is not effective on catalyzed finishes.

#### PROCEDURE:

- Clean the area using Amalgamator Solvent and a clean cloth.
- Pour Amalgamator into padding pad and disperse by tapping into palm vigorously.
- Although the padding need not be too heavily saturated, it should be more moist than when applying Lacover® Padding Finish or Rapid Pad® Padding Finish.
- Amalgamator is applied to the surface by padding in a circular motion.
- Limit the circular motion to an eight inch area.
- Once this area has been repaired, continue by padding the remaining surface in a similar fashion.
- After Amalgamator has been allowed to dry for 15 minutes, follow with a finishing coat of Rapid Pad® Padding Finish. Apply Rapid Pad® Padding Finish with the grain to eliminate any circular marks resulting from the Amalgamator application.

## HOW TO APPLY LACOVER® PADDING FINISH WITH A PADDING PAD

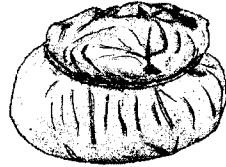

### PROCEDURE:

**A.** Put Padding pad in palm of hand.  
**B.** Pour approximately 1/4 ounce of Lacover® Padding Finish into the pad (See Figure 1).  
Precaution: Never soak or saturate pad with Lacover® Padding Finish. The pad should never feel wet but should feel moist or cool to the touch.

**C.** Disperse Lacover® Padding Finish throughout the pad by tapping pad into the open palm of the hand (See Figure 2). This will avoid a wet spot in the pad and will help produce an even flow during application.

**D.** Lacover® Padding Finish is never wiped on a surface in the same manner as standard furniture polishes. Imagine the swinging motion of the pendulum in a grandfather clock (See Figure 3). Lacover® Padding Finish should be applied in the same manner. Do not bend the wrist or stop the swaying of the pad while on the surface. Wherever possible, pad with the grain of the wood (See Figure 4). Avoid padding cross grain on any furniture surface.

**E.** Continue padding until surface or defective spot has been built up or refinished with Lacover® Padding Finish. Bare spots, packing marks, and surface scratches can be repaired with the above method. For an entire surface, we recommend Rapid Pad® Padding Finish or Lac French™ Padding Finish.

Trace Cloth French  
Polishing Pad*

Figure 1

Figure 2

Figure 3

Figure 4

## HOW TO STAIN EDGES WITH PADDING FINISH

1. Dampen Pad with Lacover® Padding Finish.
2. Work powdered Blendal® Stain into pad.
3. Pad over defect.
4. This method is generally employed to shade in a larger defect and is most successfully used on furniture arms, legs, edges, etc.
5. Alternatively, apply dry powder Blendal® Stain to defect and then spray over area with a clear aerosol Tone Finish® Toner. Fold trace cloth twice. Hold tight over finger. Apply Lacover® Padding Finish and rub Blendal® Stain on top and stroke lightly back and forth over area requiring stain and finish. This method is for small areas where stain and finish is required, such as edges, carvings and etc.

## HOW TO APPLY A PADDING FINISH TO AN ENTIRE SURFACE WITH RAPID PAD

Unlike Lacover® Padding Finish which is recommended for spot refinishing and staining, Rapid Pad® Padding Finish flows and spreads more freely. Rapid Pad® Padding Finish is a surface padding finish that does not penetrate or bite into the original finish. Streaking or marks caused by overlapping can be easily avoided with this padding finish. Rapid Pad® Padding Finish should not be used in conjunction with padding stains because of its nature to spread, making it difficult to localize the stain to the spot requiring repair.

### PROCEDURE:

Application of Rapid Pad® Padding Finish is similar to that of Lacover® Padding Finish. Extremely fine surface scratches can be rubbed out with Rubbing Compound or Poly Buf™ Compound of proper grit. Use Flat Lube™ Paste Flatteners on oil - walnut finishes.

## PIGMENTS & DYES

### Wiping Wood™ Stain

Semi-transparent, pigmented, solvent-based stain. Non-grain raising, fade resistant. Easy stir, soft-settling formula. Only 30 minutes drying time is needed before a lacquer sealer coat can be sprayed. Apply by spray, brush or cloth. Pigmented Wiping Stains are easier to control because there's less lapping. An ideal uniforming stain

when applied over dye stains prior to sealing. A dark color tone is easily lightened with Wood Stain Reducer, Toluol, or Lacquer Thinner. This stain will never bleed through the finish. Open work time can be increased by adding Wood Stain Retarder. Virtually any finish can be applied over Wiping Wood Stain: lacquer, shellac, varnish, polyurethane, acrylics and many others.

*Custom color matching available with a minimum  
5 gallons per color.*

### Wood Tone Wiping Stain

Wood Tone Wiping Stains are 250 VOC compliant, semi-transparent, pigmented, solvent-based stains that are perfect for kitchen cabinets, architectural millwork or any other type of interior wood surface. They are fast drying, fade resistant and deliver a crisp, clean, close to the wood appearance. Only 30 minutes drying time is needed before being sealed or topcoated. Simply apply by brush or cloth and then wipe off the excess. Pigmented type stains are easier to use for most finishers because there is better control and less lapping. Virtually any finish can be applied over Wood Tone Wiping Stain. Wood Tone Wiping Stains are ready to use right out of the can.

## PIGMENTS & DYES

### Seal & Stain™ Pre-Stain/Clear Stain Base

Used as a pre-stain treatment of wooden surfaces to reduce blotchy areas in soft woods before staining. Sand wooden surface with 150 or 180 grit sandpaper. Apply by spray, brush or rag liberally over entire surface and remove excess by wiping with a cloth. Allow Seal & Stain™ Pre-Stain/Clear Stain Base to dry 15-30 minutes before applying any M520, M530, or M545 stain color. Best results are achieved if the stain is applied within 12 hours. Used as a clear stain base with colorants to mix custom colors. Up to 20% by volume of Mohawk M500 or HUL 844 tint colorants may be added to Seal & Stain™ Pre-Stain/Clear Stain Base to create custom stain colors. Seal & Stain™ Pre-Stain/Clear Stain Base may also be added to any M530 or M545 wiping stain to reduce color intensity.

Note: Bases are short filled to accommodate colorant.

**M545-0106** 29 oz.  
**M545-0107** 116 oz.

### Xpert® Stain Base

Mohawk Xpert® Stain Bases are available in two formulas, medium solids and high solids to meet your custom color mixing needs. Xpert® Stain Bases may be tinted with Mohawk Xpert® Colorants, M844 series, and can accommodate up to 12 ounces per gallon (3 ounces per quart) to achieve custom color. Custom color blends of the Xpert® Stain Base are suitable for all interior wooden surfaces and may be sealed or topcoated with all Mohawk Professional Finishing System® (PFS) products.

Medium Solids (for light to medium colors)

**M540-1036** 29 oz.  
**M540-1037** 116 oz.

High Solids (for medium to darker colors)

**M540-1056** 29 oz.  
**M540-1057** 116 oz.

Note: Bases are short filled to accommodate colorant.

The following sizes are available as a custom item with a minimum order of 5 pails.

**M540-1038** Medium Solids 580 oz.  
**M540-1058** High Solids 580 oz.

### Xpert® Toner Base

Mohawk Xpert® Toner Base is a spray on and no wipe, low solid, vinyl tint base that is used with Mohawk Xpert® Colorants (M844's series) to create custom, semi-transparent pigmented toner colors.

Toners are commonly used under a wiping stain or glaze to help establish an even background color by blending the natural variation of interior wooden surfaces to a uniform color. It may be used as a stand alone color that offers better hiding and more even tone than dye stains. Available in 116 oz.

- Do not exceed more than 12 ounces per gallon of total colorant
- Perfect for blending multi-species of wood to a uniform color
- Can be used to create "no wipe" type stain colors

**M540-1077**

### Xpert® Colorants

Mohawk Xpert® Colorants are a professional line of colorants that can be added to Mohawk Xpert® Stain Bases, M545 or M530 stains, glazes and Professional Finishing System® (PFS) products to create custom colors. The Xpert® Colorants are quality controlled and held to a strict color standard which means end users can expect repeatable results of their custom color formulations. Xpert® Colorants are critical components of the Mohawk Color Match System. *Note: Colorants are short filled to 30 oz. to accommodate mixing with bases.*

## PIGMENTS & DYES

### Ultra™ Penetrating Stain

A truly new dye type stain that offers superior transparent qualities found only in dye stains. Excellent lightfastness. Will not bleed into top coat finishes. May be brushed, wiped or sprayed directly on wood or mixed in lacquer for toning. Colors may be intermixed to create additional shades. Mohawk's Ultra™ Penetrating Stain offers the user the best combined characteristics of water, alcohol, or lacquer type dyes. New - 120 VOC compliant.

*Custom color matching available with a minimum order of 5 gallons.*

### Penetrating Oil Stain

The ultimate quality in a penetrating stain. These dye stains provide excellent clarity and color depth to the finish. Gallon

- Can be used on a previous finish to stain the finish before another topcoat
- Dry time of one hour
- Can be tinted with Universal Colors
- May be brushed, wiped, or spray applied
- Compatible with most topcoats, sealers, fillers, conversion varnishes, stains and glazes as long as the proper drying times are observed.

M522-3587	Dark Walnut
M522-3847	Dark Red Mahogany
M522-3877	Brown Mahogany

### TRYING OUT A NEW STAIN; STAINING DIFFERENT WOODS

The strength or depth of a color is determined by the concentration of the stain solution. When trying out a new stain, always start with a weak solution and keep applying the stain until you get the desired color. It is much easier to apply several light coats of stain than it is to wash out an over-stained wood surface (which can prove nearly impossible). The most common classification of stains are pigment wiping stains, dye stains, and toner stains. Different kinds of wood fall into two main classes, each with different stain characteristics. These are woods with close grain and tight pores, such as maple, birch, cherry, gum and pine; and woods with open grain and spongy pores such as rosewood, mahogany, walnut, oak, and Philippine mahogany. Stains will "take" much more readily on open grain, "spongy" wood, therefore the stain concentrations should be weaker when used on walnut or mahogany. Generally, close grain woods will need little or no filling, therefore any contrast between the color and the grain pattern is accomplished almost entirely by the stain coat.

### SUGGESTIONS ON COLOR MATCHING

Mixing the primary colors (Red, Yellow & Blue) produces secondary colors (Orange, Green & Violet):	Red + Yellow = Orange Blue + Yellow = Green Blue + Red = Violet
Adding White to a color produces lighter shades or tints:	Blue + White = Light Blue Bluish Green + White = Turquoise Yellow + White = Ivory Vermillion + White = Flesh Black + White = Gray
Adding Black to a color produces a duller color:	Red + Black = Brown Blue + Black = Slate Green + Black = Olive Purple + Black = Plum

When mixing a new color, use a very small can, noting carefully the proportions of the various colors employed. Larger batches are then made according to the same proportions. Remember that thickness of film and texture of surface will cause a variation in the shade of the same color. Wiping Stain colors are mixtures of pigments having different specific gravities and therefore different degrees of settling; thorough stirring is essential in order to obtain a uniform shade.

## PIGMENTS & DYES

### Bleachtone™ (Pickle Frost/Whitewash)

Bleachtone™ is a unique product that is used to create the popular pickle-frost look. Bleachtone™ allows end users to achieve a transparent layer of color on maple that does not block out the grain. Bleachtone™ is white in color but can be tinted with colorants to create custom colors. Bleachtone™ can be sprayed directly onto the wood or added (no more than 40%) to the E-Z Vinyl® Sealer for improved color control. Bleachtone™ should be sprayed at approximately 30 p.s.i. and applied in multiple coats, similar to the Ultra™ Penetrating Stain, to achieve the desired color. Glaze can be applied over Bleachtone™ to create a variety of popular looks.

**M550-2027** White

### Bleachtone™ Reducer

Used to control the intensity of Bleachtone™ Wood Tone. Be sure to use in limited amounts until the desired effect is achieved. Can be reduced with up to 4 parts Reducer to 1 part Bleachtone™ Wood Tone. Gallon

**M550-2227**

### Aniline Powder Stain (Dye Type)

Penetrates deeply into wood. Transparent powder dye type stain. Enhances the natural beauty of the grain. Requires one to five ounces of stain per gallon of solvent according to color strength required. Manufactured from the finest conventional dyes obtainable. Color may vary with type of solvent and temperature of solvent used.

#### Alcohol/water soluble:

- Water: Dissolve in Aniline Reducer and add water.
- Alcohol: Dissolve in Aniline Reducer.

### Break-A-Way™ Glaze

Mohawk's Break-A-Way™ Glaze is the perfect product to easily add heavy hang up and detail accent color to ornate fine woodworking or cabinetry. Break-A-Way™ Glaze is spray or foam brush applied over a sanded sealer or finish coat and then allowed to dry to a chalky, powdered state that is easily removed from unwanted areas using light pressure with a synthetic abrasive pad to the desired look that you are after. Break-A-Way™ Glaze must be topcoated with a clear finish of your choice. *(Note: Allow to dry 1 hour after removing excess if topcoating with a waterborne finish.)* Break-A-Way Glaze™ will help you create dramatic, clean accent lines on any shaped surface. Break-A-Way™ Glaze may also be intermixed to achieve custom colors. You may never want to wipe a glaze again after trying Break-A-Way™ Glaze.

- Spray applied (20 PSI)
- May be used under or over water borne finishes
- Superior hang and build compared to solvent glazes

#### GLAZING STAINS

Mohawk Glazing Stains are used in finishing processes. A glaze is a layer of color applied over a sealed surface to add highlights, to blend colors, or to create decorative effects. The glaze is then sealed in with finish topcoats. Glazes are not intended for direct application of color to raw wood. Glazing stains are typically more concentrated in color and thicker in consistency than regular wiping stains. Pigment colors are used as the colorants in manufacturing glazes. Glazing stains may be applied by brush, rag, or in some cases by spraying. Most frequently, the glaze coat follows the sealer coat. They are applied liberally and then part or most of the stain is wiped off and uniformed depending on the desired effect. Since glazes are generally made with a drying oil base, they will have a recoat window. The window usually requires application of a layer of topcoat within one to six hours after the glaze is applied or the possibility of wrinkling will exist. Glazes are also popular for use on antiques for touch-ups and refinishing, and for specialty finishes (Faux finishes) such as marbleizing and goat skin effects.

# STAINS

## COLOR CONCENTRATES

### Base Concentrate Pigmented Stain Colorant

A finely ground pigment in a high viscosity liquid form, free of fillers and extenders. Recommended for making Pigmented Wiping Stains, Glazing Stains, Shading Lacquer and Tinting Lacquers. This pigmented colorant will mix with lacquer thinner, lacquer, glaze, lacquer sealers and synthetic finishes. Not recommended for water reducible, shellac, alcohol or mineral spirits based coatings.

#### Recommended Reducing Proportions:

- Wiping Stains: 20% Colorant and 80% Reducer S-15
- Glazing Stains: 20% Colorant and 80% Clear Glazing Liquid
- Shading & Tinting Lacquers: 1 to 3 oz. color per gallon of lacquer

*Custom match colors are available. Minimum order is 5 gallons per color.*

## PROFESSIONAL FINISHING SYSTEM

### Waterborne Pre-Catalyzed Lacquer

Mohawk's Waterborne Pre-Catalyzed Lacquer is a water reducible, self cross-linking, low VOC emitting technology that has good color retention and is suitable for cabinet, millwork, furniture and other high traffic interior wooden surfaces. Waterborne Pre-Catalyzed Lacquer passes KCMA tests with as little as two coats and can be used as a self sealing system.

Waterborne Pre-Catalyzed Lacquer is formulated to meet production shop needs and is an excellent environmentally friendly alternative to comparable solvent base pre-catalyzed products. Waterborne Pre-Catalyzed Lacquer may be applied over any Mohawk stain. Note: Allow oil type stains to dry a minimum of 1 hour for improved adhesion.

Mohawk's Waterborne Pre-Catalyzed Lacquer is available in plastic single gallon and 5-gallon pail containers, which resist rusting and improve the product's shelf life.

- GREENGUARD Certified as a waterborne system
- Suitable for LEED® credits: EQ Credit 4.2 Low Emitting Materials - Paints & Coatings
- Contains no formaldehyde
- Low odor
- Water clean up

## PROFESSIONAL FINISHING SYSTEM

### Waterborne Dye Stain

Mohawk's Waterborne Dye Stains represent one of our most environmentally friendly, low emitting VOC technologies and are water reducible transparent spray stains that may also be brushed or wiped to create clean, natural, vibrant colors for cabinet, millwork, furniture or other fine interior wooden surfaces. Mohawk Waterborne Dye Stains are fast drying, offer good color retention with minimal grain raise that can be sealed or topcoated in as little as 30-45 minutes. Waterborne Dye Stains may also be added into Mohawk Waterborne sealers and topcoats to create toners and shading stains.

Waterborne Dye Stains are available in 12 stock wood tone colors, which may be blended to create custom colors. The Waterborne Dye Stain Base (M620-00017) may be used to reduce the color intensity of stock colors or with the concentrate colors to mix a custom color from scratch.

- Ultra low VOC
- GREENGUARD Certified as a waterborne system
- Suitable for LEED® credits: EQ Credit 4.2 Low Emitting Materials - Paints & Coatings
- Blends easily when applied
- Low odor
- Water clean up

### Waterborne Colorant

Mohawk's Waterborne Colorants are environmentally friendly, zero VOC, water reducible pigment colorants that may be mixed with Mohawk waterborne products to create custom colors for cabinet, millwork, furniture and other fine interior wooden surfaces. Mohawk Waterborne Colorants offer excellent color retention and are quality controlled for repeatability. *Note: Colorants are short filled to 30 oz. to accommodate mixing with bases.*

- Zero VOC
- GREENGUARD Certified as a waterborne system
- Suitable for LEED® credits: EQ Credit 4.2 Low Emitting Materials - Paints & Coatings
- Contains no formaldehyde, phthalates or lead
- Low odor
- Water clean up
- Use with any Mohawk waterborne product

### Clear WW Lacquer

Clear WW Lacquers have always been trusted for high quality furniture production. These high quality lacquers are our best selling nitrocellulose formulations in factories and shops around the world. Our unique production minded formulas are shipped at spray viscosity to help you save time and money by getting the build you need with less applications. Clear WW Lacquers are ready to spray (RTS) high solids-low viscosity formulas that enable user to achieve the best flow and build without reduction.

- Quick dry
- Excellent flow out
- Water clear coat
- Ready to spray viscosity
- Economical choice
- Easy to touch up

## PROFESSIONAL FINISHING SYSTEM

### Buffcote™ Lacquer

Buffcote™ Lacquer contains waxes that provide dazzling results for all types of fine furniture and interior woodwork. This unique lacquer delivers a very soft look and feel that will “wow” your customers and is formulated to give a hand rubbed effect right off the spray gun. The slightly amber appearance of Buffcote™ Lacquer also adds to the patina of the wood. Buffcote™ Lacquer offers quick dry and quick build along with exceptional flow and leveling. Buffcote™ Lacquer looks great over stained wood or as a beautiful natural finish.

- Conventional VOC formulation
- Ready to spray
- Perfect for interior furniture, antiques or architectural woodwork

### DuraCoat™ Pre-Catalyzed Lacquer

DuraCoat™ Pre-Catalyzed Lacquers are premium quality professional finishes for furniture, kitchen and bath cabinets and millwork shops that are extremely user friendly. DuraCoat™ feature high solids, moisture resistance, good flexibility, mar resistance, and are much more durable than regular nitrocellulose lacquers. When used as a self-seal system or over our E-Z Vinyl® or high solids DuraCoat™ Pre-Catalyzed Sealers, DuraCoat™ produces an exceptional finish system that passes KCMA testing. DuraCoat™ Pre-Catalyzed Lacquers are ready to spray (RTS) high solids-low viscosity formulas that enables user to achieve the best flow and build without reduction.

## PROFESSIONAL FINISHING SYSTEM

### DuraCoat™ Pre-Catalyzed Sealer

DuraCoat™ Pre-Catalyzed Sealer features a premium high solids formula for building a first rate finish quickly. Specifically formulated to be used with our DuraCoat™ Pre-Catalyzed topcoats or any Mohawk post-catalyzed topcoat system. DuraCoat™ Pre-Catalyzed Sealer offers excellent moisture resistance with good color retention qualities. Low VOC. DuraCoat™ Pre-Catalyzed Sealer is a ready to spray (RTS) high solids-low viscosity formula that enables users to achieve the best flow and build without reduction.

### E-Z Vinyl® Sealer

E-Z Vinyl® Sealer is a professional grade, high solids formula that is designed for use in high contact areas where improved durability, water resistance, and adhesion are critical. A key advantage is improved system flexibility. When properly applied under Mohawk pre-catalyzed or post catalyzed systems, the system passes and/or exceeds KCMA testing. No Catalyst needed. E-Z Vinyl® Sealer is a ready to spray (RTS) high solids-low viscosity formula that enables users to achieve the best flow and build without reduction.

### Ultra™ Clear Conversion Varnish

#### (Post Catalyzed)

Ultra™ Clear Conversion Varnish provides the ultimate high-end professional interior finish performance and appearance. These products not only pass all of the KCMA Household Chemical Tests, they exceed the requirements. Ultra™ Clear Conversion Varnish is a post catalyzed water white conversion varnish. When used with our Ultra™ Clear Conversion Varnish Sealer or a Self-Sealed system, these topcoats produce a finish system of maximum durability, wear, and moisture resistance. They have good color retention properties and form a highly flexible film. A UV inhibitor is included to stabilize colors. These finishes can be sprayed with conventional, airless, HVLP, and air-assist airless equipment. Use Ultra™ Clear Conversion Varnish wherever the ultimate in finish protection is desired, such as kitchen and bath cabinets, laboratory, dormitory, office furniture, and display fixtures. Low VOC. Must be catalyzed before use. Please see product directions for catalyzation rate. Ultra™ Clear Conversion Varnishes are high solids-low viscosity formulas that enables users to achieve the best flow and build without reduction.

### Ultra™ Clear Conversion Varnish

#### Sealer (Post Catalyzed)

Ultra™ Clear Conversion Varnish Sealer is formulated to be used with Ultra™ Clear Conversion Varnish Topcoats. This product features excellent flow, build and sanding properties. Before use it must be catalyzed at a rate of 4 oz. per gallon with M615-701 catalyst. Ultra™ Clear Conversion Varnish Sealer is a high solids-low viscosity formula that enables users to achieve the best flow and build without reduction.

### Conversion Varnish Reducer/Retarder

This unique solvent is specifically blended for Mohawk conversion topcoats and sealers. It can be used to reduce the viscosity, slow down the drying time or for clean up. Use only the Mohawk Conversion Varnish Reducer/Retarder to insure compatibility and professional results with the Ultra™ Clear or VersaClad® Conversion Varnish topcoats and sealer. **Warning: This is not a VOC exempt solvent. If an exempt solvent is needed, use Acetone (M650-001) to reduce Mohawk's VOC compliant conversion varnish products at a rate of no more than 20%.**

M650-1057 Gallon

### BoothCoat™ Spray Booth Protector

Mohawk's BoothCoat™ Spray Booth Protector helps keep your expensive spray booths clean and protects it from overspray build up. It eliminates dark work areas and makes clean up a breeze. A clean spray booth reduces the risks of loose debris landing on your work and improves safety conditions caused by years of caked on overspray build up. Apply by spraying on multiple light coats (3-4 recommended). It dries in minutes. When you are ready to clean up the spray booth simply peel the BoothCoat™ Protector off, dispose of in accordance to your local solid HAZMAT waste regulations and reapply.

M617-0017 Gallon

### VersaLac® Post-Catalyzed Lacquer

VersaLac® is an easy to use, professional grade, high performance lacquer that is specifically formulated for high contact areas such as, kitchens and baths. VersaLac® is water clear, high solids, HAPS compliant and low VOC. VersaLac® is also easy to mix. One bottle of pre-measured catalyst is added to a 5 gallon pail having a 6-month shelf life after the catalyst is added which is superior to the normal post-catalyzed products. VersaLac® produces a higher level of durability and near conversion varnish performance with all the benefits of a pre-catalyzed finish system. VersaLac® works great as a self-sealing system or with the E-Z Vinyl® and DuraCoat™ Pre-Catalyzed Sealers. VersaLac® lacquers are supplied at a ready to spray viscosity.

## PROFESSIONAL FINISHING SYSTEM

### VersaClad® Conversion Varnish

#### (Post Catalyzed)

VersaClad® Conversion Varnish is an economical choice for a quick dry, post-catalyzed, acid cure finish. VersaClad® Conversion Varnish can be used as a self-sealing system or with the E-Z Vinyl® Sealer. It offers maximum durability and moisture resistance and is perfect for any stained or natural color furniture, kitchen or bath cabinet and millwork application. Must be catalyzed at a rate of 10 oz. per gallon with M615-701 catalyst. VersaClad® Conversion Varnish are high solids-low viscosity formulas that enable users to achieve the best flow and build without reduction.

### Hydro-Gold® Waterborne Lacquer

Finally, an environmentally friendly coating that works like it should. Hydro-Gold® Waterborne Lacquer is a water reducible, high solids, ultra low VOC self-sealing coating. This product boasts low odor, non-yellowing characteristics and has been developed with the professional shops in mind.

Enjoy flash, flow, build and drying properties that rival solvent base coatings. The Hydro-Gold® Waterborne Lacquers are perfect for cabinetry, furniture and other interior wooden surfaces and may be applied over any Mohawk stain. (Note: Allow oil type stains to dry a minimum of 3 hours for improved adhesion).

Hydro-Gold® Waterborne Lacquer sheens may also be intermixed to achieve other sheens.

### White Undercoater

Mohawk White Undercoater is the perfect primer for preparing any paint grade type of interior surface. Production environments will appreciate White Undercoater's ease of use because it is ready to spray directly out of the can. White Undercoater is a conventional VOC product and works well with any Mohawk opaque or clear topcoat.

- No catalyst required
- 25% solids by weight
- Dries quickly and sands easily

# COATINGS & FINISHES

## NITROCELLULOSE LACQUERS & SEALERS

### Industrial Sanding Sealer

A high quality nitrocellulose base sealer. Use to fill pores on wood and provide a smooth base for lacquer topcoat. Free sanding. Use with Mohawk Industrial Lacquers.

**WARNING: Not recommended for use in high moisture areas such as kitchens and bathrooms.**

GALLON      5 GALLON  
**M610-1607      M610-1608**

### Heavy Bodied Sanding Sealer

A high quality sealer that builds faster and sands more freely than regular sealers. The Heavy Bodied Sanding Sealer is 25% solids by weight. Some reduction may be required. Use with High Solids W.W. Clear Lacquer or industrial Lacquer.

GALLON      5 GALLON  
**M610-1657      M610-1658**

Also available in Aerosol - see page 8

### Zinsser SealCoat

SealCoat is a 100% dewaxed shellac-base sanding sealer, manufactured using a patented process that guarantees long-term stability and shelf-life. The absence of any wax in SealCoat makes it compatible with all clear finish topcoats including oil-base polyurethanes.

QUART      GALLON  
**M610-1696      M610-1697**

### Colored Lacquer

Durable nitrocellulose spray type lacquer. Excellent color depth and coverage. Intended for interior use only. New wood should be sealed with Primer Surfacer or Mohawk Sanding Sealer. For additional protection, depth and luster, top coat with clear lacquer of the desired sheen. Reduce with Mohawk Lacquer Reducer 2255.

**WARNING: Not recommended for use in high moisture areas such as kitchens and bathrooms.**

*Custom color matching available. Minimum 5 gallons per color.*

#### PIGMENTED UNDERCOATS

Undercoats can be best described as a type of sanding sealer that contains a colored pigment. They are designed to fill pores and provide an opaque base for use under solid colored topcoats. Fewer coats of the topcoat will be needed. Undercoats are able to be sanded and thus help to produce a smoother overall surface. Primer surfacers are similar in nature but, when used on wood, should be applied over a clear sanding sealer base.

## URETHANE / NITROCELLULOSE HYBRID

### Nu-Coat™ Lacquer

What has the toughness of a catalyzed finish without all the hassle? Nu-Coat™ Lacquer combines the fast drying and ease of application of nitrocellulose lacquer with the toughness and resistance properties of polyurethane. Produces a tough finish which resists mars and most solvents encountered in normal use. May be colored with Mohawk Base Concentrate™ colorants. Sprays easily and can be re-coated in as little as 30 minutes. Nu-Coat™ Lacquer is recommended as its own sealer.

**WARNING: Not recommended for use in high moisture areas such as kitchens and bathrooms.**

## POLYURETHANE FINISH

### Pour-N-Wipe™ Finish

An alternative to brush or spray finish application. A very versatile finish with applications in finishing, refinishing and restoration work. It imparts a satin sheen, protecting wood against alcohol and water staining and is very mar resistant.

- Wipes on as easily as furniture polish!
- Provides a tough, alcohol resistant polyurethane finish.
- Apply with a cloth or by a "squeegee" for large surfaces.
- Pour-N-Wipe™ finish is self sealing.

M603-3016 Quart  
M603-3017 Gallon

### Finish Up™ Polyurethane

LOW VOC 380 g/l

A user friendly wipe on finish. Finish Up™ Polyurethane can be applied over repairs such as Burn-ins, Fil-Stik® Putty Stick fills, Blendal™ Powders and Touch Up Markers to seal in the repair, leaving a durable protective finish. Can be applied over properly cleaned existing finishes to improve appearance and durability. Finish Up™ Polyurethane adheres well to most types of lacquers, vinyl clads, high pressure laminates as well as many other substrates. Best of all, it is water based and has almost no odor. This feature makes Finish Up™ Polyurethane the product of choice where aerosols and other solvent based touch up finishes are not appropriate.

## VARNISHES & SHELLACS

### Exterior Door & Trim Varnish

A high solids exterior varnish recommended for the highest quality work. It is a copolymerization of several different resins and drying oils. It has outstanding gloss retention and durability. Mohawk Exterior Door and Trim Varnish contains an ultraviolet shield. Gallon

M603-5007

### Shellac Reducer

Shellac Reducer is used to thin or reduce shellac based products, cleans glass and other non-lacquered surfaces. Shellac Reducer may also be used to clean fine bristle brushes after using with shellac based products.

M650-0057 Gallon  
M650-0058 5 Gallon

## OIL FINISHES

### Danish Oil

Produces a natural oil finish fast, easy. Just wipe on -let penetrate - wipe dry. Polymerized wood finish, combines penetrating oils with resins to produce a natural oil finish on unfinished wood. One application seals and finishes wood. Never gums up in warm temperatures. Will not print and is nongreasy. Water spots, stains, burns and scratches are easily removed by buffing with 4/0 steel wool and Danish Oil.

M700-1507 Natural Gallon  
M700-1508 Natural 5 Gallon

### Danish Oil Aerosol

A deep penetrating oil finish with the durability of urethane. Won't chip or peel away as the polymerized finish seals and hardens the wood. Net Wt. 12 oz.

M103-0650 Dark Walnut

# COATINGS & FINISHES

## OIL FINISHES

### Tung Oil (Modified)

Mohawk Tung Oil (Modified) is a proprietary blend of non-break tung oil and propolymerized alkyd resin in a solvent system. Recognized as fast drying, hard, resistant to water, acid, alkali and mildew. One of the most durable of all natural oils. An ideal oil finish for new or stripped wood furniture. One coat achieves a low luster finish. Each additional coat increases gloss. Far superior to linseed oil, as finished wood will not darken with age. Tung Oil preserves the natural color of the wood. Surface scratches in a Tung Oil finish piece can be removed with steel wool and a small amount of Tung Oil. An occasional polishing with Mohawk's Lemon Oil Polish will preserve the beauty of the original finish.

M701-1597 Gallon

## SPECIALTY FINISHES

### Salad Bowl Finish - Clear

Behlen Salad Bowl Finish has been specially formulated to allow for the following statement. "This product contains FDA regulated ingredients complying with 21 CFR 175.300." and therefore achieves a non-toxic, safe for food contact (in its cured state) finish. Behlen Salad Bowl Finish has the application ease of an oil finish (just use a clean white cloth) and the film building and sheen producing (up to a satin) qualities of a varnish. Wooden bowls, wooden utensils, butcher blocks (not intended for cutting boards or cutting blocks) and recreational related objects (games, puzzles, pull toys) when finished with Salad Bowl Finish may be used in contact with foods. To insure that materials coated with Salad Bowl Finish may be used in contact with food, one must follow label directions.

M603-00016 Quart

### Crackle Lacquer

Crackle Lacquer creates a quick antique crackle-like finish when applied over a contrasting gloss such as Mohawk Colored Lacquer. For example, black over white yields white visible in the cracks or clear over white simulates an antique white enamel finish. Effective only when a wet coat is applied with a spray gun over conventional gloss lacquer finish. Gallon *Custom color matching available with a minimum 5 gallons per color.*

M616-0317 Black  
M616-1257 Clear  
M616-2207 White  
M616-8187 Cream

### Classic Instrument Lacquer

Formulated to produce a superior finish on thin, flexible tone woods such as those used on stringed musical instruments. Excellent flow, flexibility and durability. Superior rubbing qualities yield a mirror-like reflectance. Supplied ready to spray. Gallon

M610-1407

### Piano Lacquer

Piano Lacquer is a high quality nitrocellulose lacquer specially formulated to allow higher build without sacrificing clarity for piano finishing and refinishing projects. Piano Lacquer also has excellent rubbing characteristics. Piano Lacquer is provided in a ready to spray viscosity. Piano Lacquer is ideal for:

- Piano finishers and refinishers
- Furniture builders and refinishers
- Furniture retail stores

M610-1307 Gallon Gloss  
M610-1308 5 Gallon Gloss

## SPECIALTY FINISHES

### Lacquer for Brass

Will keep your brass and brass-plated metal surfaces brilliant. It's a water clear, non-yellowing and durable coating.

Adhesion to metal surfaces is excellent.

- Keeps metal bright and new looking
- Prevents tarnishing
- Protects

Net Wt. 13 oz.

M103-0500

### Leaf

Imported Metal Composition Leaf gives a striking and rich effect similar to Gold Leaf at a much lower cost. Widely used in interior decorating, gilding, picture frames, furniture and art objects. Sizing Liquid is required for applying the leaf. Priced per book. 25 sheets per book.

M472-2200 Gold (5 1/2" x 5 1/2")  
M472-2201 Silver (5 1/2" x 5 1/2")

### Sizing Liquid

Clear Sizing Liquid is used with Gold and Silver Leaf products. Fast drying, very little color. Drying can be slowed up by adding a small amount of Boiled Linseed Oil. May be colored with Universal Colors. Net Wt. 16 oz.

M472-2215

## REDUCERS, SOLVENTS & ADDITIVES

### Lacquer Reducer 2255

Formulated with only the highest quality solvents. The special blend helps prevent orange peel and helps provide good flowout. Recommended for use with all Mohawk Nitrocellulose Lacquers.

M650-0107 Gallon  
M650-0108 5 Gallon

### Wood Stain Reducer S-15

A balanced formulation of solvents which insures the proper application and drying of Mohawk's Wood Stain (M545), Universal Colors and Base Concentrate™ colorants. Gallon

M650-2507

### Blush Resistant Reducer

Blush Resistant Reducer is specially formulated to give lacquers enhanced flow free of orange peel and other defects. Recommended for Mohawk High Solids W.W. Lacquer, Sanding Sealer, as well as other lacquers when thinning is required. Resistant to blushing and improves gloss and leveling.

M650-0807 Gallon  
M650-0808 5 Gallon

### Flash-Off™ Control Solvent

Flash-Off™ Control Solvent is used to improve the flow of lacquers and sealers by extending the "flashing" or initial drying stage without slowing the overall drying. Additions of one or two ounces of Flash-Off™ Control Solvent per gallon of lacquer will eliminate overspray roughness in the finish and improve the overall smoothness. Not a blush retarder. Gallon

M716-5007

### Mineral Spirits

Petroleum distillate; used for reducing oil base color concentrates, stains, and varnishes.

M650-2307 Gallon  
M650-2308 5 Gallon

## REDUCERS, SOLVENTS & ADDITIVES

### Acetone

Acetone is considered an exempt VOC, strong, fast evaporating solvent used for thinning and cleaning fiberglass resins, epoxies, vinyls, lacquers and adhesives. Acetone may be used as needed for reducing Mohawk's Ultra™ Penetrating Stains (M520). It may also be used with Mohawk's Wood Tone Wiping Stains (M530) and all Mohawk 550 and 275 VOC compliant finishes if reduced no more than 20%. Acetone will not contribute any additional VOC's to products.

- M650-0017    Gallon
- M650-0018    5 Gallon

### Naphtha

Petroleum distillate; used for reducing paste wood fillers, and some stains. Provides a faster dry for products that offer a choice of Mineral Spirits or Naphtha as a solvent. Also used as a clean-up solvent.

- M650-0047    Gallon
- M650-0048    5 Gallon

### Clean-Up Solvent

Mohawk Clean-Up Solvent is reclaimed solvent that contains a high percentage of acetone. It is suitable for effectively cleaning spray guns, brushes and other finishing equipment. Do not use Clean-Up Solvent to thin or reduce any Mohawk coating or stain. Due to the reclaimed nature of this product the solvent color and odor may vary slightly from batch to batch, which does not affect the product's performance.

- M650-9008    5 Gallon
- M650-9009    55 Gallon drums - available as a custom order (4 drum minimum)

### No Blush™ Retarder

Prevents lacquer from turning white and prevents orange peel. Prevents lacquer from blushing or turning white (a cloudy effect) in humid or cold weather. Helps prevent orange peel caused by too rapid drying of the finish. Add 5% to 10% No-Blush™ to the lacquer thinner used to reduce lacquer. Gallon

M716-2407

### Super Blush™ Retarder

Very slow tail end solvent for lacquer. Use in extremely high humidity areas to avoid blushing. Gallon

M716-3407

### Fish Eye FlowOut™ Lacquer Additive

Helps to prevent fish eye depressions caused by silicone contamination. Recommended additive for lacquers. Improves flow out and gloss. Packaged in a convenient 1 ounce eye dropper bottle. 8 ounce refill bottles are also available.

- M716-1601    1 oz.
- M716-1604    8 oz. Refill

### Flattening Paste

Flattening Paste may be used to reduce the sheen of Mohawk's nitrocellulose, pre-catalyzed and or conversion varnish topcoats. See Mohawk's Flattening Paste Product Data Sheet (PDS) for recommended additions to achieve specific sheens. Stir thoroughly into coating. Strain the material afterwards. Quart

M716-1706

## RUBBING AGENTS

### Pumice Stone

Produces a soft luster. Use to produce a smooth finish after applying the final coat of lacquer or Varnish. Rub the entire surface with 4F Pumice Stone and Rub-Cut™ Oil. A soft luster finish will be the final result. Net Wt. 5 lbs

M720-1404    Extra Fine 4F

## RUBBING AGENTS

### Rotten Stone

Produces a hi-gloss finish. Extra fine powdered abrasive for achieving a mirror-like finish on various coatings. This material has extra fine cutting and smoothing properties. Excellent for high-gloss finishes. Applied with water or Rub-Cut™ Oil. Often employed after a finish has been rubbed with Pumice Stone. Net Wt. 5 lbs.

M720-1500

### Bril-Glow™ Mild Abrasive

Restores the new look to finished surfaces. Removes surface scratches. Restores the “new” look to coated surfaces which have become cloudy and lifeless. Applied as a polish and then buffed until the original true beauty of the finish is restored. Quart

M770-1006

### Rub Cut™ Oil

Also known as Paraffin Oil. Designed as a rubbing agent for use with abrasive papers, Pumice Stone, etc. Rub Cut™ Oil speeds rubbing and leveling due to its formulation of fine chemical abrasives and cutting oils. Gallon

M740-1007

### Rubbing Compound

Level I (Low Sheen)

Semi-paste, fine abrasive compound for rubbing down lacquer, shellac and most other finishes. Removes minor surface imperfections and overspray on spot repairs. Use Neutral on white and light colored surfaces. Black is ideal for darker finishes. Use by hand or with buffer. Quart

M730-1006 Neutral

M730-4006 Black

### Liquid Rubbing Compound (3-Step)

Level II (Medium to High Sheen)

#### STEP 1: Liquid Rubbing Compound

Used to remove overspray and wet sanding scratches on conventional and modern high tech finishes. Yields a high satin sheen. Use for hand or machine buffing.

#### STEP 2: Liquid Polishing Compound

Chemically cleans and polishes while removing Step 1 compound scratches and swirl marks. Yields a medium gloss sheen. Use by hand or with machine buffers.

#### STEP 3: Liquid Finishing Compound

Removes swirl marks from Step 2 Polishing Compound and increases surface gloss. Leaves a “polished” look. Use by hand or with machine buffers.

QUART

M730-0106 Step 1 Rubbing Compound

M730-0206 Step 2 Polishing Compound

M730-0306 Step 3 Finishing Compound

### Poly-Buf™ Rubbing Compound

Level III (Super High Sheen)

Compounds used after Step 3 Finishing Compounds to achieve the high gloss “wet look.” Start with the medium grade for initially rubbing out a refinished surface. Use the fine grade for rubbing fine scratches, and the extra fine grade for extra fine scratches and increasing the gloss.

## RUBBING AGENTS

### Wool-Lube™ Rubbing Lubricant

Wool-Lube™ is a multi-purpose, water reducible, non-abrasive rubbing and sanding lubricant. Wool-Lube™ is non-toxic and contains no silicones. Used full strength or slightly reduced with water as a lubricant with steel wool or abrasive pads for smoothing, removing packing marks and scratches from finished surfaces. When reduced with water, Wool-Lube™ is an excellent sanding lubricant for use with wet/dry sandpapers. Does not interfere with the adhesion or drying of lacquer. Finishes rubbed with Wool-Lube™ and an abrasive can be recoated immediately after being wiped dry. Can be used with dry abrasive powders such as Pumice, Rottenstone, and Tripoli. Use of a sanding lubricant greatly extends the life of waterproof sandpapers.

### Flat Lube™ Paste Flattener

Paste Flattener used with water and a steel wool pad to produce a satin or flat sheen finish. Cleans easily and is completely free of residue. Apply with 1/0, 2/0, or 3/0 steel wool depending upon how flat a sheen is desired. Eliminates hairline scratches. Ideal for oil walnut finishes. Quart

**M720-1306**

### Buff-N-Polish Kit

The most popular products available for scratch removal and buffing of all finished furniture surfaces. Removes scratches, buffs and polishes:

- Lacquer finishes
- Catalyzed finishes
- Polyesters

**M905-0700**

#### Contents:

Poly Buf™ Polishing Compound  
1 each of Medium and Extra Fine (8 oz)  
Micro-Mesh Abrasives  
1 each of #2400, 3200, 3600, 4000, 600, 8000, and 12000  
1 Cork Block

## ADHESIVES

### Super Grip™ Resin Glue

Cream colored, liquid, dries colorless. A ready-to-use, heavy duty, aliphatic resin adhesive of outstanding strength. Solvent resistant, heat resistant and impact resistant. Unharmed by repeated freezing and thawing. Super Grip™ Glue will bond a wide variety of materials, such as leather, imitation leather, high pressure laminates, cloth and certain rubber products, to themselves or to other materials (one of the materials must be porous so that moisture can leave the glue line). Used in furniture factories and industrial woodworking plants for heavy joint work, lamination, edge gluing and general assembly. Not waterproof.

**M745-3404** 8 oz.  
**M745-3406** Quart  
**M745-3407** Gallon

### Polyurethane Glue

Titebond® Polyurethane Glue is a breakthrough in adhesive technology. It is the only polyurethane glue to combine a long 20 minute working time with a short 45 minute clamp time. Offers superior wood-to-wood performance with excellent sandability and is unaffected by finishes. Ideal for metals, ceramics and most plastics. Ready to use. Net Wt. 8 oz.

**M745-3105**

### Aerosol Activator

The Aerosol Activator has been formulated so it can be used successfully in just about any situation you can think of. For best results, apply sparingly at a distance of about 11 inches from the target. Net Wt. 10 oz.

- The Activator cures Instant Adhesive on white wood dents within about ten seconds or less without causing undue chlorois.
- The Activator does not adversely affect finishes when gluing broken pieces and splinters on finished wood. It does not soften the finish or leave a telltale shiny spot.
- The Activator is effective when it is applied to one piece of wood, the glue is applied to another piece, and then the pieces are joined. The Activator will not prematurely cure the adhesive before it bonds the parts.
- The Activator does not leave an oily residue.

**M745-2012**

## ADHESIVES

### Industrial Grade Instant Adhesive Cyanoacrylate Glue

Industrial grade for maximum bonding strength. The thin version wicks into tight places where flowing into and under is essential. Medium and Heavy are for semi-smooth surfaces.

Gel viscosity is for filling and bonding porous surfaces. Non-whitening activator accelerates curing time. De-Bonder removes unwanted or excess glue. Glue any combination of wood, naughyde, plastic, veneers, cardboard, rubber, ceramics, leather or vinyl. No clamping, instant set.

- M745-1241 Thin Adhesive - 1 oz.

### Epoxy Glue - Liquid

This product retains all of the physical strengths of epoxy adhesives while offering the added advantage of quick setting, even in thin films and at low temperatures. It will bond steel, ceramics, copper, wood, and nearly all other types of materials including concrete. It is nonshrinking and will even harden under water. 12 Hour Cure is used where excessive stress and strain is a factor (furniture legs). Two part formula mixes 1 to 1.

3-5 MINUTE WORK TIME

12 HOUR CURE

- M745-2008 Each part 4 oz.
- M745-2016 Each part 8 oz.

2 HOUR WORK TIME

12 HOUR CURE

- M745-2001 Each part 4 oz.

## ADHESIVES

### Epoxy Adhesive

Two-part industrial grade adhesive which mixes in the dispensing unit tip. No mess, no measuring. Sets in 6 to 8 minutes. Clear

and woodtone available. Wood tone can also be used as a filler. *NOTE: Mixing tips are not included with adhesive or gun and must be purchased separately.*

- M745-1431 Clear Adhesive - 50 ML.
- M745-1432 Pine Adhesive - 50 ML.
- M745-1433 Dispensing Gun
- M745-1434 <sup>∞</sup> Epoxy Mixing Tips - Pkg. of 12
- M745-1435 Epoxy Mixing Tips, 6", fits white cartridge only - Pkg. of 12

<sup>∞</sup> Available while supplies last.

### Epoxy Paste Adhesive

High quality epoxy adhesive in paste form. This product is designed as a general purpose rapid set adhesive. Provides excellent results. Heavy enough to use without sagging or dripping on vertical surfaces.

Can be pre-mixed with Blendal® Powders to match the finish being repaired. This Epoxy Adhesive can handle the toughest projects including badly splintered wooden parts. Two part formula mixes 1 to 1. Each 16 oz.

M745-2125

### Spray Adhesive

Spray Adhesive offers a fast tack time, which enables general purpose bonding on a wide variety of substrates, high bond strength and may be used to create a temporary or permanent bond. It's unique formula prevents soak in of the adhesive on porous surfaces. Spray Adhesive does not contain methylene chloride and meets Federal and State VOC requirements. Net Wt. 13 oz.

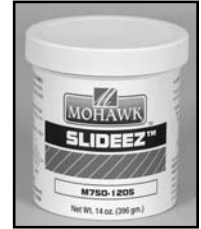

M103-0195

## LUBRICANTS

### Slideez™ Lubricant

Lubricates wood, metal or plastic. Due to semi-paste consistency, lubrication will last much longer. Drawers, windows and doors work easier with an application of Slideez™ Lubricant. Good for starting wood screws, prevents binding of all moving parts. This product will not stain or cake up, and is non-flammable. Does not contain silicones. Net Wt. 16 oz.

M750-1205

### Silicone Dry Lubricant

Lubricates and prevents sticking of doors, drawers, locks, hinges, latches. Protects against corrosion and rust on tools, machinery, moving parts, conveyors, cutting blades. Prevents bunching and binding, speeds cutting, sewing and fabric flow in the textile industry. Unaffected by water, oil and most common solvents. Will not freeze, melt or flush off.

Net Wt. 11.5 oz.

M103-0177

### E-Z Slip™ Lubricant

Greaseless wood lubricant for drawers, doors, windows and any wood fixtures that tend to bind. Reduces friction, prevents wear, and helps to increase ease of moving parts. Net Wt. 13 oz.

M103-0477

## POLISHES

### Penthouse® Polish

Penthouse® Polish protects and preserves the natural beauty of all fine furniture. Excellent for use on all types of finishes on furniture, cabinets, doors, woodwork and paneling. Net Wt. 14 oz.

M107-0333  
M107-0333IM

*Available with Personalized Imprint -Your firm's name, address and phone number imprinted on label. Minimum 144. See Custom Price List for details.*

## POLISHES

### Bristol® Cream Polish

Recommended polish for all finishes: furniture, vinyl, leather, enamel and porcelain. Cleans as it polishes, imparting a rich, clear patina finish. Wipes perfectly clean, completely free of oil residue. An occasional dusting with a cloth treated with Bristol® Cream Polish is all that is needed to insure lasting beauty. Does not contain silicones.

## SURFACE PREP

### Wax Wash™ Remover

Removes wax and oils from surfaces. A blend of solvents which in one application will remove wax and oil from any surface. Prior to applying a new finish or spot repair, clean surface with Wax Wash™

Remover. The presence of oil or wax on a surface will retard drying of a new finish which can be avoided by cleaning with Wax Wash™ Remover. Benzene, Naphtha or alcohol by themselves will not remove all foreign matter as well as this product. Good to use on furniture, woodwork and appliances prior to refinishing.

M712-1906 Quart  
M712-1907 Gallon

### Wax Wash™ Remover

Removes wax, oil and foreign materials from most surfaces in one application. The presence of wax, oil or foreign materials can retard drying or cause defects in finishing topcoats. Prior to applying a new finish or repair, clean surface with Wax Wash™ Remover. Ideal for furniture, appliances, woodwork and other surfaces.

M107-0190

# POLISHES, WAXES, & CLEANERS

## SURFACE PREP

### Silicone Wash

Excellent afterwash for removers. A wash which helps to remove silicone residue caused by polishes and waxes. Also minimizes fisheye problems from silicones. Mohawk Silicone Wash is an excellent afterwash for removers. Gallon

M712-3207

### Finish Remover No. 2 (Non-Flammable)

The finest remover available... non-flammable... semi-paste. No neutralizing. No dewaxing after use. This is the best all-around remover that has been specially formulated to tackle today's tough finishes. Fast acting. Has body and substance which will cling to vertical surfaces. Will not disturb the patina of the wood.

M710-2727    Gallon  
M710-2728    5 Gallon

### Stripper Wash

The best product for removal of wax residue left by furniture strippers. Prepares the stripped surface for proper refinishing. Effective and easy to use. Gallon

M710-2007

## UPHOLSTERY CLEANERS

### Vinyl-Plastic & Leather Cleaner

Easily cleans vinyl upholstery, leather, rubber, enamel, ceramics and chrome appliances. Not only cleans but also provides a protective film for subsequent recleaning. Also recommended for vinyl auto tops and upholstery. Net Wt. 15 oz.

M107-0479

### Upholstery / Fabric Cleaner

Cleans fabrics, rugs, clothing and other surfaces. Upholstery/Fabric Cleaner is effective on grease, tar, adhesive residue, crayon, lipstick and ink. High force spray helps to loosen stubborn stains. This cleaner dries fast and leaves no residue. Net Wt. 13 oz.

M103-3000

### Ink Remover

Removes ball point pen ink from vinyl upholstery, polyester, cotton and wool fabrics. Will not hurt materials. Just dab on and blot off with clean cloth when ink is dissolved. If finish is removed, use Mohawk's Clear Vinyl Spray Finish.

M874-0001

### ZipKleen™ II Spot Remover

Contains 100% active cleaning solvents. All purpose spot cleaner for upholstery, rugs and fabrics. Nonflammable, dries odorless within two minutes. Removes all types of stains - grease, tar, oil, gum etc., without injuring the finest colorfast material. Leaves no ring.

M770-2107    Gallon  
M770-2108    5 Gallon

### ZipKleen™ II Spot Remover

A versatile, effective spot cleaner for upholstery, rugs, and fabrics. Removes stubborn stains such as adhesive tape, tar, oil, grease, gum, and more. Fast acting, leaves no odor in the fabric after drying. Leaves no ring. Safe for most fabrics. Evaporates quickly. Net Wt. 13 oz.

M107-0465

## MOHAWK Professional Leather System

Identifying different types of leather finishes and determining what touch-up and repair products are suited for each can be a difficult task. To make it easy, all Professional Leather System products are coded to help you choose the correct products. Below you'll find simple descriptions of different kinds of leather, and their corresponding Codes. All products on the following pages are coded to make it easy to match leathers with the appropriate products.

### **Aniline (also called Natural)(A)**

The surface of this leather has been colored with transparent dyes. This transparency is similar to looking at a piece of stained wood, whereas the grain stays natural and visibly distinguishable. Aniline leather will have imperfections and differences, just as fingerprints are different for each individual. This difference is nature's signature and assurance that every hide is one of a kind. These leathers have minimal surface protection and thus tend to show the effects of usage such as wear, scratches, UV exposure, etc.

To maintain the natural beauty of aniline leather it is mandatory to establish a routine of cleaning and protection. Leather Protector should be applied right at the beginning of usage. Cleaning and protection should then be done every six months, even more often on high traffic areas.

### **Semi-Aniline (A)**

This leather is covered with a lightly pigmented coating on which transparent and brilliant colors are oversprayed to reconstruct the natural appearance of the leather. Since the coating is thin, it offers only minimal protection, so an application of Leather Protector is recommended.

### **Pigmented or Top Coated (P)**

This is the most widely used finishing technique. The finish consists of an opaque basecoat of pigmented resins followed by a protective topcoat. The natural color of the leather is completely covered. Therefore, pigmented leather can be identified by its uniform color. It is ideal for high use items like furniture or automotive seats, especially when you want your kids to use them "trouble-free". With the aid of Mohawk Professional Leather Care products, these leathers are easily maintained. If restoration is necessary, full re-coloring is possible

### **Pull Up (X)**

Fashions come and go, but waxy and oiled leathers are here to stay. These two related types of leather are called "pull up," a phrase originally used to describe the effect on a type of leather also known as "Timberland" after that well-known footwear producer made this type of article famous. These leathers lighten when stretched, bent or "pulled up." They are categorized as natural because they do not have a thick topcoat.

### **Nubuck (N)**

This leather is actually aniline leather that has been sanded to give it a fine, velvety surface. It should not be confused with suede, which is the flesh side of leather. The look and feel of nubuck leather is incomparable for low use applications where elegance is desired. To properly care for nubuck, it is important to adhere to a routine of cleaning followed by protection. This regimen should begin as soon as the piece is put into use and continued at regular intervals throughout the life of the piece. MOHAWK has specific products for the care and preservation of nubuck leather. It is important to use these specialized Nubuck products on Nubuck leathers.

### **Bycast (B)**

This is a completely different system of finishing or enhancing leather (usually split leather or heavily buffed leather). It maintains a very consistent thickness and softness over the entire area of the leather, not only on any given hide but from hide to hide as well. The technique consists of creating the finishing film on a continual support of release paper. An adhesive is applied to the film, and then the film is pressed on the leather. The finished leather is then removed from the release paper displaying a perfectly uniform surface. Often, when stretching bycast leather, you can see a lighter color that reverts back to the original color once the pressure is released. This is sometimes used to identify bycast leathers.

## LEATHER CARE

### Leather Cleaner (A,B,P,X)

Leather Cleaner is a water based, 100% non solvent cleaner designed to clean gently but thoroughly, without harming the natural beauty and feel of the leather. It is formulated specifically for grained leathers; those with a topcoat as well as natural aniline leathers. Leather Cleaner will clean general soiling as well as water based and protein based stains from leather. Leather Cleaner is most effective when used in combination with a sponge. Leather Cleaner is designed to keep cleaning residue to a minimum.

M850-10014 8 oz.

### Microfiber Cleaner

Microfiber Cleaner is a totally solvent-free cleaner for delicately and efficiently removing dirt and water-based or greasy stains from microfiber.

M850-10054 8.5 oz.

### Leather Clean and Renew (A,B,P,X)

Leather Clean and Renew wipes safely clean and condition pigmented (top-coated) leathers. Use Leather Clean and Renew periodically to keep your leather clean, leaving a pleasant and renewed feel. Apply once a week for maximum efficiency. Comes in a handy dispenser.

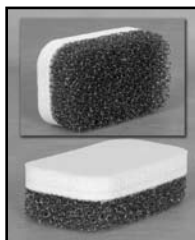

M850-1019 50 Sheets

### Nubuck Reviving Sponge (N)

Nubuck Reviving Sponge is a dry sponge for bringing back the typical velvet (writing) effect of nubuck and suede leathers.

M870-9202

### Leather Protector (A,P)

Leather Protector is a highly advanced product designed to assist leather in repelling water, oil, and alcohol based stains. It is perfectly suited for natural grained leathers because it doesn't change the feel or the color of even these sensitive leathers while adding stain resistance. For topcoated leathers, the application of Leather Protector will ease the removal of difficult stains like ink, lipstick, mustard, newspaper print, and blue jean transfer. Leather Protector forms a transparent, breathable barrier that will improve stain resistance and efficiency of cleaning.

M850-10064 8 oz.

M850-10066 Quart ∞

∞ Available while supplies last

### Leather Protector Wipes (A,P)

The same great formula as our liquid leather protector above, in a convenient dispenser. 150 Cloths

M850-10068

### Pull-Up Revive (X)

Pull-Up Revive makes available in a hand application the same type of formulation applied at the tannery. Over time, the tannery applied pull-up effect will diminish with use. This is most evident by a lightening of the leather in high use areas. Pull-Up Revive will renew and restore pull-up effect leathers. It will also improve scratches caused by fingernail marks, scuffing, etc.

M850-10074 8 oz.

### Leather Revive (A,B,P)

Leather Revive is a highly advanced product designed to revitalize pigmented leather that has become dried out, stiff, or is squeaky. When dry, apply Leather Protector to renew the protection level.

M850-10084 8.5 oz

## LEATHER REPAIR

### Ink Remover (P)

Ink Remover is a product specifically made to remove recent ink marks or lipstick stains from top coated leathers or vinyl surfaces. "Recent" is defined as 3-5 days. Permanent markers contain solvents to increase the penetration of the dye and will not likely be removed.

M850-2015 .65 oz. Stick

### Leather Degreaser (A,N,P)

Leather Degreaser effectively removes accumulated or saturated oil stains from leather. Over time, hair or skin oils can absorb into the leather and leave a stain. This often appears as a darkening effect in the contact areas. Leather Degreaser is formulated to penetrate into the leather, absorb the stain, and lift it into an easily manageable powder.

M850-2017 6.5 oz.

### Scratch Remover (A,X)

Scratch Remover is a simple solution for healing and blending surface scratches or rubs on natural leathers. It helps restore the surface color as well as blend the damage. It is very effective on fingernail scratches in aniline leather. For some leathers, Mohawk Pull-Up Revive may provide the best solution. Scratch Remover is not intended for pigmented or nubuck leathers.

M850-2030 .65 oz.

### Deep Cleaner (P)

Deep Cleaner is a very strong cleaner for topcoated (pigmented) leathers. It performs a powerful cleaning action by removing all types of stains, including oily and greasy stains. It is very effective on newspaper, denim dye transfer, and dye transfers in general.

M850-20164 8 oz.

### Repairing Paste (P)

Repairing Paste is a flexible adhesive that has enough body to fill as well as adhere damaged areas, particularly surface abrasions. It is especially effective where the leather has several small cuts that are raised like "scales." After drying, it is flexible and difficult to detect. For deep cuts, use Mohawk Leather Glue. 2.6 oz.

M850-2031 2.6 oz.

### Leather Glue Water Based (A,B,P)

Leather Glue is a flexible, strong adhesive formulated specifically for repairing flaps, abrasions, and minor cuts. It can also be used to repair larger cuts in conjunction with a backing material.

M850-2032 .65 oz.

### Mender (P)

Mender is used to repair scratches and abrasions on pigmented leathers from which the finish has been removed. Use a spatula to fill cracks and scratches with Mender. (Mender can be colored with a maximum 10% addition of Touch Up Pigment.)

M850-2036 2.6 oz.

### E-Z Flow™ Leather Marker

E-Z Flow™ Leather Markers offer breakthrough technology in the design of a new valve and applicator system. Just a couple of pushes on the valve, and the marker is ready to use. The sponge applicator flows effortlessly to spread color evenly every time, no matter how large or small of a spot is being restored. The color lays flat, with no ridges between the rows, blending seamlessly with the surrounding area. The screw-on top provides an air-tight seal so the applicator stay wet and ready for your next repair.

## LEATHER REPAIR

### Touch Up Pigment

Touch Up Pigment is a single step product that combines fixation, adhesion, light filling properties, pigment, and topcoat all in one easy to use product. It exhibits high performance specs for dry rubbing, wet rubbing, and flexibility. It is the final step in covering repairs on pigmented leathers with color and/or sheen adjustment. Most often, it is used over a damaged area that has been repaired with Mohawk Leather Glue Water Based or Repairing Paste. Available in 2 oz. and 8 oz. sizes.

2 oz.	8 oz.

M850-9024 Leather Trend Assortment <sup>1</sup> (24-2 oz colors)

### Touch Up Pigment Dulling Agent (P)

Touch Up Pigment Dulling Agent is used to reduce the sheen of Touch Up Pigment.

M850-22304 8.5 oz.

### Backing Fabric Activator Kit

Durable cloth material used to support repairs. Comes with self-adhesive on one side which becomes activated once Activator is applied. Kit includes 2 sheets 6 x 13 inch backing fabric and one 1/2 oz. bottle of activator.

M850-9007

### Touch Up Aniline (A)

Touch Up Aniline is used for the care and repair of aniline leathers that have undergone fading or that are damaged by usage. It will revive aniline leathers, increasing the brightness of the color tones.

2 oz.	
M850-210112	Black
M850-210132	Yellow
M850-210142	Red
M850-210152	Blue
M850-210162	Neutral

### Grain Mold Compound & Catalyst (P)

Grain Mold Compound is blended with a specific amount of Catalyst, then spread over the grain surface which you desire to reproduce. The Catalyst cures the Grain Mold Compound to an exact duplicate of the grain surface in a few minutes. The mold is reusable indefinitely.

M870-6503 Grain Mold Compound 4 oz.  
M870-6001 Catalyst .5 oz.

## LEATHER REPAIR

### L/V Repair Heat Cure Compound

Cured with Heat Iron, Heat Gun or Cordless Burn-in Knife to produce a permanent flexible bond with the surrounding leather or vinyl. Grain can be reproduced either with Grain Paper or Grain Mold Compound. When properly prepared and applied, repairs become invisible.

**M872-6804** 8 oz.

### Atomizer

The Atomizer is a very inexpensive and easy to use tool for spray-applying Leather Spray Gun Grain (M870-9400). It has 2 tubes positioned at 90 degree angle. One tube is the mouthpiece while the other is the dip tube. The user blows through the mouthpiece causing liquid to be pulled through the dip tube and atomized into a sprayed mist. It is fast and convenient to use because it doesn't have to be hooked to a compressor or an aerosol power pack. Atomizers are most popular for applying Leather Spray Grain, but some technicians also use it to apply Touch Up Pigment and Top Coat over their repairs.

**M870-9350**

### Spray Grain

Spray Grain restores the grain pattern that is often lost during the repair process. It is a clear, high-viscosity liquid that is applied in large droplets to simulate the texture of leather or vinyl. It is quick drying and may be force dried for even faster repairs. Touch Up Pigment, Base Coat, or Top Coat is used over Spray Grain to complete the repair. Spray Grain is usually applied with a mouth atomizer but may be applied with an airbrush that is adjusted to spatter rather than spray a smooth coat.

**M870-9400** 4 oz.

### Woven Fiberglass Fabric

Woven Fiberglass Fabric dramatically increases the durability of L/V Repair Heat Cure Compound repairs on leather and vinyl. The repairs remain supple yet there is no telltale outline. Woven Fiberglass Fabric is added to the top of the repair, becoming interwoven with Heat Cure Compound as the compound is applied and then cured. Since the fabric is at the top of the repair and is part of the repair, the fabric does not allow cracks to form between the leather and the Heat Cure Compound when flexed or pulled. It is easy to use.

**M870-9450**

## LEATHER REFINISHING

### Top Coat Gloss (P)

Top Coat Gloss is a ready to use, high sheen waterborne topcoat that is tough and scratch resistant. It displays excellent feel, rub resistance and adhesion - all without graying. A mixture of Gloss and Matte will produce various degrees of sheen. Add FM Slip/Non-Slip Additives up to a maximum of 3% to achieve desired effect. Crosslinker MC may be added in an amount equal to 10% of the Top Coat mixture.

**M850-20334** 8 oz.

### Top Coat Matte (P)

Top Coat Matte is a ready to use, low sheen waterborne topcoat that is tough and scratch resistant. It displays excellent feel, rub resistance and adhesion - all without graying. A mixture of Gloss and Matte will produce various degrees of sheen. Add FM Slip/Non-Slip Additives up to a maximum of 3% to achieve desired effect. Crosslinker MC may be added in an amount equal to 10% of the Top Coat mixture.

**M850-20344** 8 oz.

### Crosslinker MC (P)

Crosslinker MC is the catalyst for Top Coat Gloss and Matte. It provides a very high rub resistance to the restored leather. It may also be used in Base Coat and Adhesion Promoter. Add Crosslinker MC in an amount equal to 10% of the Top Coat or 5% of Base Coat to be catalyzed.

**M850-20354** 8 oz.

# PROFESSIONAL LEATHER SYSTEM

## LEATHER REFINISHING

### Remover (P)

Remover is used for the surface cleaning of finished leather goods when surface grease removal is necessary. The aggressive action of Remover in additional applications will remove the finish as is necessary prior to the use of Degreaser and prior to reconstruction of a complete new finish.

M850-20377 1.3 Gallon

### Adhesion Promoter (P)

Adhesion Promoter is a soft polyurethane with extraordinary adhesion, high tenacity and a low tack. It is used as an adhesion promoter and sealer to prepare leather to accept Base Coats.

M850-20387 1.3 Gallon

### FM Slip Additive (P)

FM Slip Additive is a feel modifier that imparts a silky and slightly wet feel to Top Coat and, in turn, to the leather. When added to Top Coat, it remarkably increases scuff and wet rub resistance.

M850-20394 8.5 oz.

### FM Non-Slip Additive (P)

FM Non-Slip Additive is a waterborne feel modifier, particularly suitable for upholstery leathers, that imparts a supple, slightly draggy feel. It does not feel greasy.

M850-20404 8.5 oz.

### Base Coat (P)

Base Coat is to be used for reconstruction of the finish on pigmented leather. This product provides good coverage and excellent adhesion. Quart

- M850-23526 White
- M850-23536 Black
- M850-23546 Blue
- M850-23556 Lemon Yellow
- M850-23576 Yellow Oxide
- M850-23586 Red
- M850-23596 Red Oxide
- M850-23606 Violet

### Leather/Vinyl Finish™ (P)

A flexible and durable coating used to protect and blend in spot repairs on leather and vinyl. 13 oz.

- M109-0629 Clear Gloss
- M109-0630 Clear Satin
- M109-0631 Clear Flat
- M109-1000 White Vinyl

## CUSTOM

As a service to our Customers, Mohawk provides custom color matching for many of our core items. See your Mohawk Price List for the custom product order procedure.

### Spew Remover (A,B,P)

Occasionally, fat liquors used during the tanning process or natural animal fat can migrate to the surface leaving a white film. This film can be wiped away but will reappear. Spew Remover displaces the film and penetrates into the leather to prevent reoccurrence, because it has properties to lock the fats into the leather.

- M851-00016 Quart
- M851-00017 Gallon

### Mold Remover (A,B,P)

Mold Remover is formulated for the removal of stains caused by the growth of mold on leathers. Mold causes staining that has the appearance of dark green spots and is usually combined with an offensive odor. Mold Remover eliminates the stain and retards further growth; thus the leather returns to its original condition.

- M851-00026 Quart
- M851-00027 Gallon

## KITS

### Nubuck Care Kit

Cleaning, protecting and revitalizing Nubuck or Suede leathers.

#### Contents:

- Nubuck Cleaner - 6.7 oz.

## WOOD KITS

### Assorted Blendal® Powder Stains

The Assorted Blendal® Powder Stains Kit contains 12 - 1 oz. jars of our most popular shades:

Black, Blue, Burnt Sienna, Burnt Umber, Canary Yellow, Dark Burnt Umber, Raw Sienna, Raw Umber, Red, Van Dyke Brown, White and Yellow Ochre

As with all of our Blendal® Stains, these colors can be mixed and matched to produce the desired color. Features include:

- Handy kit with marked spaces.
- Most popular and basic colors.
- Price advantage.
- Replacement colors are available.

**M370-1200** Assorted Blendal® Powder Stains

### Blendal® Powder Stain Kit #1

Assortment consists of 42 bottles in 36 colors of popular wood tones to match walnut, maple, pine, cherry, and mahogany as well as a full assortment of difficult-to-match wood shades. Blendal® Stains are finely ground pigments. Used in conjunction with Lacover® Padding Finish, Graining Liquid or clear aerosol finishes to repair color defects without removing the original finish. Trays can be removed for easier access to all colors.

11 Assorted Staining Liquids, 4 Graining Colors, Retarder, Clear Base, Brush Cleaner, Tinting Guide, Loop, Glass and Brushes

## WOOD KITS

### Finisher's Glaze™ Stains

Each of these shades can be mixed to help produce the desired color. Add richness and color depth to your final finish. Glazing has many different uses, such as:

- Use to get a desired effect or to help produce a certain color.
- Produces attractive alternatives to just plain stains and lacquers.
- Use as a stain; wipe or brush over sealer.

**M504-1200** Finisher's Glaze™ Stains

#### CONTENTS:

8 - 4 oz. jars of our most popular basic colors:  
Raw Umber, Burnt Umber, Raw Sienna, Burnt Sienna, Van Dyke Brown, Jet Black, White, Clear

Also available in Bulk - see page 32

### Universal Colors Kit

Use for tinting all types of solvent-thinned lacquers, varnishes, acrylics, alkyds and mineral spirit based products.

**M562-0800** Universal Colors Kit

## EXPRESS KIT PROGRAM

### Touch-Up And Repair Kit

Mohawk's "Touch Up And Repair Kit Program" makes it possible to design an individual Touch-Up and Repair Kit. You can order as few as 12 kits for your use or to provide to your customers to handle most minor touch-up requirements. Select from 23 different configurations. In addition to the products you select, each kit contains a Synthetic Steel Wool Pad, Plastic Leveler Card, and Tri-lingual instruction sheet. Each kit's outer label can be personalized with three lines of text so you can show your company name, part number, color name, or any information you want to appear on the label.

Order on-line at [www.mohawk-finishing.com](http://www.mohawk-finishing.com), "Build an Express Kit".

## CUSTOMER CARE KITS

### Customer Care Kits

For furniture, cabinets, all wood & artificial finishes. Add a little T.L.C. to your sales.

- A Dealer Kit - for fast repairs of transit damages or minor Q.C. problems.
- A Consumer Kit - can be provided with each sale for added customer satisfaction.

The Customer Care Kit will be appreciated by your customers and you will appreciate how it can help minimize returns and ensure trust in your quality control program. This kit gets down to basics, providing the necessary items for fast touch-up of minor nicks and scratches. Colors may be custom matched to your standards or you may choose from a wide range of our stock colors for even faster delivery. We can personalize the kit with your name and color on the label of the box. Stand out in the crowd with Mohawk's Customer Care Kits. Customer Care Kits use a cardboard case and foam insert.

## ABRASIVES PADS

### Micro Mesh

Very fine grade abrasive pads in 7 grades used for fine scratch removal. Capable of polishing a finished surface to a semi gloss and even a high gloss surface. Commonly used on polyester or acrylic surfaces to achieve super-high gloss. 4 per package, 3" x 6".

<b>M905-0241</b>	2400 grit
<b>M905-0321</b>	3200 grit
<b>M905-0361</b>	3600 grit
<b>M905-0401</b>	4000 grit
<b>M905-0601</b>	6000 grit
<b>M905-0801</b>	8000 grit
<b>M905-1201</b>	12000 grit

### Steel Wool Pads

Flexible alternative to sanding. Perfect for curved and ornate woodwork. Suitable for use with most strippers and refinishers. Removes old finishes without harming original surfaces. Recommended for use with most stains, lacquers and protective finishes. For cleaning and removing rust from metal surfaces. Restores brass, copper and bronze. Disposable. Sold 16 per pack. Approximately 3½" wide.

16 Pack	12 Pack	
<b>M909-0301</b>	<b>M909-0311</b>	00 Very Fine grit, metal finish
<b>M909-0302</b>		000 Extra Fine grit, smoothing and polishing
<b>M909-0303</b>		0000 Super Fine grit, finishing
<b>M909-0304</b>	<b>M909-0314</b>	1-Medium grit, surface and metal preparation
<b>M909-0305</b>	<b>M909-0315</b>	2-Med/Coarse grit, paint and varnish removal
<b>M909-0306</b>	<b>M909-0316</b>	3-Coarse grit, stripping and cleaning

∞ Available while supplies last

### Steel Wool

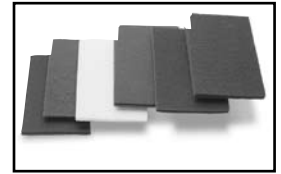

Layer built. 5 lb roll. 4/0. Approximately 3½" wide. Length: 125 ft

**M909-0540**

## Non-Woven Hand Pads (Synthetic Pads)

Your best choice for general purpose cleaning and finishing a variety of surfaces. Fast cutting non-woven hand pads leave a more consistent finish than steel wool, wire brushes, and other non-woven hand pads. Can be used with water or solvents. Will not rust. Use as a final step when generating matte finishes on some solid surface countertops. 6" x 9" pads.

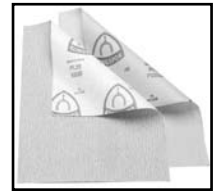

<b>M909-7401</b>	White - Light duty cleansing pad, one - non-abrasive
<b>M909-7412</b>	Green - General purpose hand pad, one - very fine
<b>M909-7415</b>	Gray - Ultra Fine hand pad, one

## ABRASIVES—SANDPAPERS

### Lightweight Silicon Carbide Stearate Dry Sandpaper

B-weight Silicon Carbide paper, resin over glue bond, semi-open coat top-coated with Zinc Stearate dry lubricant. Suitable for sanding contoured surfaces or flat surfaces by hand, with sanding blocks, or on vibrating sanders. Ideal for sanding primer, paint, bare metal, and rust; or in woodworking, for sanding sealer, wash coats, bare softwoods and hardwoods, and between coats of furniture finishes. 9" x 11" sheets. 100 sheets per pack.

<b>M906-1000</b>	P150B grit
<b>M906-1002</b>	P180B grit
<b>M906-1004</b>	P220B grit
<b>M906-1006</b>	P240B grit

### Silicon Carbide Waterproof Sandpaper

Waterproof Silicon Carbide, A-weight paper, resin-resin bonded and available in 7 grits. Use for sanding of furniture finishes such as varnish, lacquer, shellac, oil, polishing of glass, and in automotive body shops for final color sanding of paint. 9" x 11" sheets. 25 sheets per pack.

M906-1100	P220A	grit
M906-1102	P400A	grit
M906-1104	P800A	grit
M906-1106	P1000A	grit
M906-1108	P1200A	grit
M906-1110	P1500A	grit
M906-1112	P2000A	grit

### Open Coat Aluminum Oxide Sandpaper

Aluminum Oxide A, C & D-weight paper material. An extremely tough and durable synthetic abrasive. For sanding wood, metal, plastic, fiberglass and painted surfaces. Produces a soft, consistent finish at a budget price. 9" x 11" sheets. 25 sheets per pack.

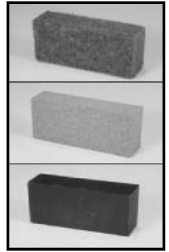

M906-1200	P80D	grit
M906-1202	P100C	grit
M906-1204	P120C	grit
M906-1206	P150C	grit
M906-1208	P180A	grit

### Sanding Block

Hard rubber, cork and felt blocks, for sanding.

M902-1000	Felt Block (4" x 2" x 1")
M902-2000	Cork Block (4" x 2" x 1")
M902-3000	Rubber Block (3¾" x 2" x 1")

### Rubbing Pads

Used for hand application of rubbing compounds for spot repair.

M960-1004

## BED HARDWARE

### Bed Hooks

Bed Hooks will convert your present bed headboard into a Hollywood bed in a few minutes without drilling holes in the headboard legs. Slip into the slit of the headboard legs in place of the former bed rails. Simply attach metal bed carriage to Bed Hooks with bolts provided. Nickel anodized finish. 1 pair.

M933-0060

### Adapter Plates

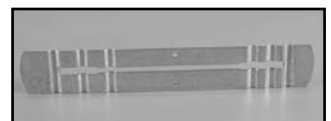

Adapter Plates enable your customers to convert old beds to modern mobile Hollywood beds. Takes care of the difference between the width of the customers headboard and the spring and mattress. Made of heavy gauge steel. Offers more than the usual amount of vertical height adjustment by having two sets of slots for connection with any metal bed frame. Nickel anodized finish. 1 Pair.

M933-0061

### Bed Rail Tighteners

Made of corrugated steel. Slip over end of bed rail hook; will take up all slack between bed rails and bed post. Also prevents squeaks. Package of 12.

M933-0100

## BED HARDWARE

### Bed Hook

For floating headboard off the floor. Hooks in-and-under standard pins in headboard. Easy installation in a few seconds with no measuring or drilling. No bolts showing to mar walls. 12 horizontal slots for desired height off floor, and side to side adjustments. One piece heavy gauge steel. Each pair conveniently packed with instructions and necessary hardware. For QUEEN SIZE BEDDING (60"). Can be used with FULL SIZE HEADBOARD: simply switch right bed hook to left leg and left bed hook to right leg. 1 Pair.

M961-0070

### Swing Hinge

M908-1001

### Display Rails (short bed)

For displaying and storing beds. Two styles. 6". No bolts supplied. Bolts available on page 87.

M933-0063 Hook on  
M933-0064 Bolt on

M968-9779

## CLAMPS

### Clamp Pipe Fixture

These widely used clamp fixtures are used with ordinary 3/4" black pipe of any length, for applications that range from do-it-yourself to industrial production. Pipe is not included.

M993-0051

### Bar Clamp-36 Inch Adjustable

Converts from a bar clamp to a spreader easily, no tools required.

Used for clamping, assembling, gluing, positioning, leveling and spreading. Quick change, multi-positioning, jaw can be positioned anywhere. 7 - 1/2" minimum spreading capacity.

M993-0056

### C-Clamp

General purpose "C" clamps for regular duty industrial service. Frames are heat treated for maximum strength.

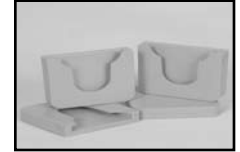

M993-0053 Open - 10"; Depth - 3-5/8"; 2400 lbs.

M993-0054 Open - 3"; Depth - 1-7/8"; 1800 lbs.

M993-0055 Open - 6"; Depth - 2-3/4"; 2400 lbs.

### Clamp Pads

Pipe and bar clamp pads. Soft durable plastic pads provide a resilient protective cushion when clamping wood, metal and plastic surfaces. Non-mar, non-stick, non-slip pads eliminate "blocks". For use with adjustable bar clamps. 2 pair.

M993-3625

### I-Bar Clamp

Bar clamps are built of fine quality steel. Self-locking. Instant-adjustable tail jaw. Clamping surface 1-3/4" x 2". Steel "I" Bar Clamp. "I" Bar design gives visible assurance of strength and stiffness. Fixed-head design. Multiple disc clutch holds securely at any point along bar. 48" long. Bar - 1-1/2" x 7/16" high-carbon steel.

M993-7296 96" Long

M993-7457 48" Long

### Handscrew Clamp

Jorgensen handscrews hold tightly over broad areas, providing greater reach and wider distribution of pressure. Holds odd shapes easily.

M993-9037 Jaw length - 10"; Opening - 6"; Reach - 5"

M993-9038 Jaw length - 6"; Opening - 3"; Reach - 3"

### Band Clamp

Band Clamp solves the special problem of clamping large round, rectangular or irregular shapes. The 2" wide band is recommended for most applications.

- Light-weight, easy to handle, strong and flexible.
- There is a screw and handle for final clamping adjustments.
- 2" wide canvas band, available in various lengths.
- Best-grade malleable iron frame with orange baked-enamel finish.
- 5/8" diameter cold-drawn steel screw with deep, smoothly cut Acme threads.
- Balanced crank-type handle

M993-6210 Clamp, Band 10'

M993-6220 Clamp, Band 20'

## CLOTH

### Trace Cloth (French Polishing)

Recommended for application of all padding finishes. Lightweight. Soft textured Closely woven. Prevents streaking. Makes an excellent polishing cloth.

M904-1001 5 lb. Box  
M904-1002 25 lb. Box

### Soft Tack Cloth

Soft Tack has a soft hand and less tacky feel. Easy to work with and extremely effective. 6 per package. 17" x 12".

M904-4000

### Cheese Cloth

A high quality, bleached white, close mesh cheese cloth. May be used to apply wiping stains, polishes, or padding lacquers. Also can be used in multiple layers to strain paints and stains. Excellent for general dusting.

M904-8001 5 lb. Box  
M904-8002 25 lb. Box

### Tack Cloth

Removes dust, dirt, lint and sanding residue before and between coats when antiquing, painting, staining, varnishing, and auto body repairing. Super Strength. 4 1/2 sq. feet.

M904-8003

M985-2007 1 Gallon

∞ Available while supplies last

### Dual Pour Spout Lid

Spout has a 57 mm re-sealable opening and includes a tamper proof seal. For 5 gallon pails.

M985-3001

### Dosing Bottle/Dispenser

Mohawk's Dosing Bottle/Dispenser is ideal for pouring dye stains, solvents and other low viscosity materials that do not need agitation. The quart size bottle includes a manual pour lid for controlled dispensing of materials and a blank label to identify the contents inside the bottle. Materials may be transferred to the dosing bottle for fast and easy dispensing.

- Controlled dispensing without the mess
- Use with waterborne and solvent materials
- Perfect addition for any color mixing studio

M984-9000

## CUTTERS-GLASS

### Glass Cutter

Glass cutter. Cuts plate glass from 1/8" to 1/4" thick. Steel wheel with honed angle of 120° for cutting single and double strength glass. Ball end handle for mapping of scored glass.

Tooth design to remove rough edges. 5" long.

M946-2025

## DESK DRAWER HARDWARE

### Back Bearing Guide

Used in conventional center-guided drawers. Will greatly improve drawer action at little cost. The self lubricating qualities of this guide reduces the effort required to slide a drawer. Wood to wood sliding is reduced to a minimum. Not affected by humidity. Tipper cleats and drawer support rails are not needed. Drawer sides and backs may be reduced in height.

M962-4280 25 per pack

## DOLLIES

### Furniture Dolly

3 wheel. 6" diameter 1 1/8" wheel size. 150 lb load capacity. 1 1/16" ground clearance.

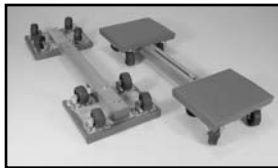

M934-2231

## DOLLIES

### Skat Skaters™

Roll away any load you can tip up and kick a pair of Skat Skaters™ under. Used in pairs, they are excellent for moving upholstered and un-upholstered

furniture, linoleum and appliances. Oak wood frames bolted together; closed length 23", extended length 32", width 8-1/2", padding 5/8" sisal; covered with high grade canvas-backed artificial leather that is securely fastened. Ball bearing casters, wheel is 2" phenolic plastic petroleum reinforced for high load capacity and easy rolling, non-smudging; resistant to chemicals and solvents. For use on hard floors and carpets. Loading capacity per pair is 1/2 ton. Sold in pairs.

M988-4109

## DOWELS

### Hardwood Dowels

Smooth satin finish. Bundle of 10. 36" length, 1/8" diameter.

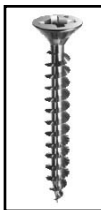

M969-3000

- M911-1002 2-1/2", 2-1/2" dia.
- M911-1003 4" tapered, 2-1/2" dia. at top

## GLIDES

### Floor Glide

Adjustable. All-plastic gliding surface, eliminates rust marks. Compact design. Simple, rapid installation. Beige plastic. 7/8" dia. head and a 1/4-20 threaded shaft. Uses 1/4" Tee Nut (not included). 100 per box. Can use Insert Nut.

M903-1313

### Tap-in Felt Bottom Glide

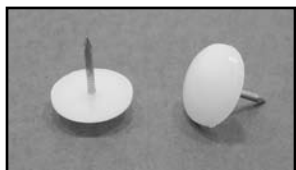

Easy to install, just tap in. Will not rust. Ideal for contemporary or antique wooden furniture, wicker or rattan. Provides protection for floors of hardwood, tile, marble, terrazzo and vinyl. Brown felt. 100 per box.

M903-2783

### Plastic Glide

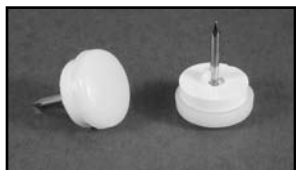

Off-white plastic. Oval head. .072" nail diameter. 11/16" nail length. 3/16" head thickness. 400 per box.

- M903-3334 5/8"
- M903-3344 3/4"

### Cushion Glide-Silent

A nylon cushion glide that helps insulate against vibration, shocks and noise. Nylon self-lubricating base assures floor and furniture protection. Cannot rust. 100 per box.

M903-6173 7/8" size

### Cushion Glide-Steel

Made of hardened steel with cushioned rubber insert insulation. The center pin is flexible, permitting the base to remain flat on the floor. 7/8" dia. head with a center nail pin. 100 per box.

M903-7584

### Flat Bottom Glides

Made of self-lubricating materials. Provides the best gliding properties. For use with any style or type of furniture. Excellent strength, good abrasion resistance, non-rusting.

- M903-8554 5/8" white, 1/4" thick, 400/box
- M903-8564 3/4" white, 1/4" thick, 400/box
- M903-8644 1/2" beige, 3/16" thick, 400/box
- M903-8654 5/8" beige, 1/4" thick, 400/box
- M903-8656 5/8" beige, 1/4" thick, 8000/box
- M903-8664 3/4" beige, 1/4" thick, 400/box
- M903-8666 3/4" beige, 1/4" thick, 8000/box
- M903-8674 7/8" beige, 1/4" thick, 400/box

### Plastic Drawer Glide

Made of hi-flex beige plastic. Excellent abrasion resistance self-lubricating, provides best gliding properties, cannot rust. Rectangular. 100 per box.

M903-8814 1/2" x 3/4" x 3/32"

### Steel Drawer Thumb Tacks

500 per box.

- M903-8900 1/2" diameter
- M903-8901 7/16" diameter

## HAMMERS & MALLETS

### Tack Hammer

Magnetized tip, fully polished 3-3/4" square head. Hickory hardwood handle. 5 ounce head weight. 10" total length.

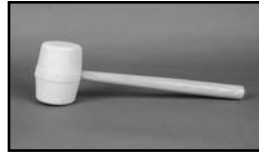

M951-0417

## HAMMERS & MALLETS

### 18 oz. Mallet

Heavy white rubber mallet will not mar surface. Superior quality, limited bounce. White hardwood handle. 2-1/2" diameter face, 4-1/2" diameter head. 14" long handle. 18 ounces.

M957-1975

### 24 oz. Mallet

Rubber mallet can be used without fear of marring metal parts. Limited bounce. Solid dense black rubber head with white hardwood handle. 2-1/2" face, 4-1/2" head, 14" long handle. 24 ounces.

M957-1976

## HEAT GUNS & BURN-IN TOOLS

### Micro Therm™ Flameless Heat Gun

The Micro Therm™ Flameless Heat Gun is a hand held self-igniting flameless heat gun and is powered by a refillable fuel cell. The Micro Therm™ is the perfect heat source for the Quick Fill™ Burn-In Stick.

- Hand held
- Automatic electronic ignition
- Patented safety lock
- Produces 1300°F flameless heat
- Refillable fuel cell-disposable butane lighter
- Compact ergonomic design
- Butane not included

M900-3215

### Small Heat Iron

The Small Heat Iron with round flat head and heat tube:

- Improved 100% Iron tip.
- Enables technicians to apply hot air to the repair area by blowing gently through the plastic tube
- A circular pad is mounted on the iron for direct heating of graining paper or grain mold
- Takes little space in a repair kit for service calls, yet can be used with Heat Cure Compound for graining and curing techniques
- Very economical

M870-5710 Heat Iron, Small w/Round Flat Head & Heat Tube

### Large Heat Iron

Excellent for repairing long rips and tears in vinyl fabrics and vinyl upholstery. Even 15" long repairs can be made with this iron. Accurately balanced. Durable. Built in heat control thermostat. 150 Watts

M870-5750 Large Heat Iron  
M870-6102 Teflon Cover Kit

### Heat Gun w/ Tip

Furnished with a specially designed tip which fits over the nozzle of the gun to focus heat flow to a 1/4" diameter. Use to cure Mohawk's Vinyl Repair Compound. Excellent tool to re-flow a repair for re-graining. New higher watt element cures compound faster. Use to repair small cuts, tears, punctures, abrasions and splits. 475 watts

M870-8600 Heat Gun w/ Tip  
M870-8640 Heat Gun Element  
M870-8700 Heat Gun Replacement Tip

### Butane Burn-In Knife M120

Cordless. Self-igniting. Butane powered. Portable for indoor/outdoor work. Lightweight. Built-in rest for idle time. Easy to refill. Quick heat-up. Full one year warranty.

M900-M120 Butane, Cordless Burn-In Knife  
M900-120C Curved Blade (will fit M900-3210)  
M900-120F Flat Blade (will fit M900-3210 & M900-M120)  
M900-120L Leather/Vinyl Tip (will not fit M900-3210)  
M110-9000 Butane Refill

### Butane Burn-In Knife

Cordless. Compact and economical to use. Good balance helps make burn-ins easier. Easy to fill. Fast heat-up. Durable with no moving parts. Fill once with butane fuel for an hour of use. Provided with a flat burn-in blade.

M900-3210 Butane, Cordless Burn-In Knife  
M900-3211 Replacement Head  
M110-9000 Butane Refill  
M900-321F Replacement Flat Blade (only fits M900-3212)

## HEAT GUNS & BURN-IN TOOLS

### Burn-In Knives

As shown, top to bottom.

M900-9200	Curved Rigid
M900-5000	Straight Rigid
M900-5170	Straight Extra-Flex
M900-6200	Curved Flexible
M900-7500	Straight Rigid
M900-K120	Flat Rigid

### Electric Burn-In Knife EK24

Dependable, rugged construction and long element life. High temperature element core assures best performance available. Strong wooden handle. High temperature, extra flexible, 6 ft. neoprene power cord in lightweight 3 conductor style. 20 watts. Weighs 8 oz. Heat Control Unit may be used for controlling low to high heat temperature. Knife comes equipped with a flat blade. A curved blade can be used separately.

M900-EK24FC	Electric Burn-In Knife
M900-B24C	Curved Blade
M900-B24F	Flat Blade

### Heat Control Unit

Regulates heat of Electric Burn-in Knife EK24. Heat is easily controlled by setting dial to maintain proper working ranges. 3 wire grounded design. Weighs 10 oz. 400 watts max. 120 volts.

M900-H800

### Electric Oven

Effectively heats manual Burn-In Knives. Includes pilot light. Heats in minutes. Maintains constant heat. Freedom from cord connected tools means-unlimited area of operation. Accessible from both ends. Equipped with 3-wire grounded circuits. 15 amp, 125 volt plug. All metal construction. Oven temperature 700-800 degrees Fahrenheit. UL approved, 115 watts, 115 volts.

M900-KPAO	Electric Oven w/ Pilot Light
M900-KPAE	Replacement Element

## KNIVES

### Utility Knife Blades-Heavy Duty

Heavy duty, high carbon steel blades. Precision-honed edge for consistent and extended cutting life. Fits most standard utility knives. 2-7/16" length x .025" thick. Blades packaged in a plastic display dispenser that mounts on the wall. 100/Pack.

M949-0100

### Mini Utility Knife, Break-Off

Comes with one blade strip.

M949-0101

### Mini Utility Knife, Break-Off Blades

For general cutting, trimming and scraping of a variety of materials. 3 per card.

M949-0102

### Utility Knife, 6"

Three position blade, retractable to full, half and one quarter. Die cast aluminum handle is durable and lightweight. Includes three 11-921 heavy duty blades. 6" length.

M949-0103

### Single Edge Razor Blade

Single-edge razor blade. Steel-backed high carbon steel blade fits all standard razor blade tools. Replacement blades for Stanley 28-100 and 28-500 scrapers. 100 per pack

M949-0301

## MASKING TAPE

### Painter's Mate Green Masking Tape

Premium Grade. Designed for use on all paints and many lacquer and varnish coatings. This tape is recognized by and known for its quality performance and its green color. It leaves clean, straight paint lines with less edge bleed. Does not lift, curl or transfer adhesive with most lacquers. This tape can also be used on rough, uneven or hard to stick surfaces. *(DO NOT USE on easily damaged surfaces, such as: wallpaper, wallboard, ceiling tile, uncured coatings or other delicate surfaces).* Width: .945" x 60 yd; 24mm x 55m

M910-2001

### Masking Tape Release (Blue Painters Tape)

Acrylic adhesive allows clean, easy removal up to 14 days without damage from painted walls, trim, woodwork, glass and metal even when exposed to direct or indirect sunlight. Backing saturant provides solvent and moisture resistance which reduces paint bleed-through and rework time.

M910-2002 .945 x 60 yd 24mm x 55 m  
M910-2003 1.89" x 60 yd 48mm x 55 m  
M910-2005 .709" x 60 yd 18mm x 55 m

## MIRROR SUPPORTS

### Mirofast Mirror Supports

Each support completely assembled. No searching for screws, brackets or nuts. Made of heavy gauge steel designed to resist twisting or swinging once installed. Bracket construction is highly durable and binding wedge nuts will not loosen. Mirror height is easily adjusted by loosening two screws and sliding the mirror up or down. Heavy mirrors require two supports to eliminate sway.

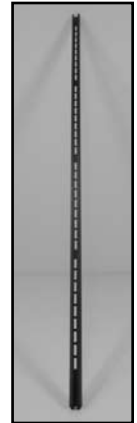

M999-1025∞ 5 foot, 12/pack assembled - Brown  
M999-4006∞ Support Straps, 6 per bag

∞Available while supplies last

### Miro-Slot Mirror Supports

Designed for narrow and plastic molded frame mirrors. Positive holding power. Requires minimum wall protection. Easy installation. Fabricated from high carbon, cold rolled steel for maximum strength and rigidity. No brackets necessary. Three wood screws attach three sliding washers through the long slots in the rod at any desired position, only one screw needed on the top position. Rod is channel shaped. One person installation. 12 per pack. Screws included.

M999-1044 4 foot unassembled  
M999-1055 5 foot unassembled

## MISCELLANEOUS

### Compound Tool

Used to push the backing fabric into and under damage. Also used to apply clear L/V Repair Compound over the backing fabric in the damaged area. 7-1/2" long. 5/16" at widest part.

M870-9200

### Match-All™ Tinting Glass

M900-4602

### Match-All™ Tinting Loop

Used to dip into the Match-All™ staining liquid to disperse droplets of color onto mixing glass. Allows user to control drops to achieve specific color.

M900-4601

### Staple Remover

# 120-1/2 Use to remove staples and tacks. Durable. Easy to use. Greater angle facilitates lifting rather than knocking out of staples.

M941-0121

### Gripper Tack Puller

Manufactured with alloy steel for strength. Precision ground and sharpened. Heat treated for durability. 7" length. 7/16" point size.

M951-0418

## MISCELLANEOUS

### Paint Strainer

Filters foreign matter or un-dissolved solid particles found in various stains or coatings (paint, varnish, lacquer or enamels).

Medium size.

M972-1001 Pack of 12  
M972-1002 Pack of 250

### Mohawk Leveler Card

Leveler Card can be use with Quick Fill™ Burn-In Sticks to level burn in or to scrape excess burn in.

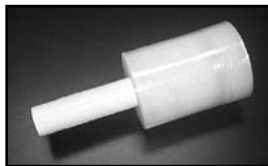

H898-0002

## PACKING / SHIPPING / DELIVERY

### Stretch Film

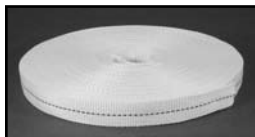

Replaces storage boxes, tape and twine. Wraps skin-tight. No adhesive residue. Protects against tarnish, rust, weather, insects, rodents, and scratches. Use for moving, shipping, and storage.

M910-2006 5" x 1000'

### Tie Down Straps

Versatile, extremely durable and rugged with a breaking strength of 1100 lbs. Ties easily and can be used on any moving job. 50 foot rolls.

M939-0100 2" width, Cotton  
M939-0625 1" width, Polyester

### Economy Van Pads

Features 34 oz. pad fill per linear yard and 1 inch zigzag stitch pattern, double stitched border. Economically priced, lighter weight pad provides good protection for furniture in transit. Full 80" by 72" size.

M995-1101 Economy  
M995-1103 Heavy Duty

## PICTURE HANGERS / WIRE

### Picture Wire

Durable, tinned flexible braided cord wire for hanging mirrors, picture, etc.

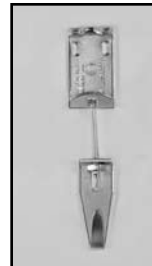

M930-1005 #5, 24 strand, 750 feet/roll, up to 31 lbs max picture weight  
M930-1006 #6, 28 strand, 625 feet/roll, up to 35 lbs max picture weight  
M930-1008 #8, 36 strand, 500 feet/roll, up to 45 lbs max. picture weight

*Note: We recommend using picture wire at least four times the breaking strength of the weight of the picture.*

### Adjustable Hanger

Used for hanging and leveling all types of mirrors and pictures. Adjustable to 1/100". Can be adjusted with a screwdriver after installation. Holds up to 100 lbs. 1 pair per card.

M968-3010

### Picture Hangers

Swivel type mirror hanger. Zinc finish. Packaged 50 pieces per box.

M969-2501

### Picture Hangers

M969-2504 30 pound capacity, 6/bag  
M969-2505 50 pound capacity, 3/bag  
M969-2503 100 pound capacity, 2/bag

### Self-Leveling Picture Hanger

Bag of 5.

M969-2506

## PLIERS

### Webbing Pliers

Hammer jaw acts as a lever if a strong pull is required. Excellent for stretching fabric and canvas. Can also be used as a hammer.

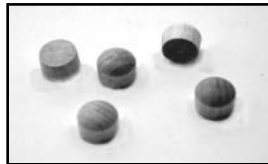

M956-2500

## PLUGS

### Round Head Plug

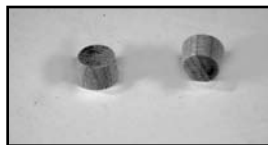

Selected clear hardwood plugs, unfinished, smooth sanded and tapered.

- M990-1622 1/4" diameter, 20 per bag
- M990-1624 5/16" diameter, 20 per bag
- M990-1623 3/8" diameter, 20 per bag
- M990-1621 1/2" diameter, 20 per bag

### Flat Head Plug

Selected clear hardwood plugs. Unfinished, smooth sanded and tapered.

- M990-1618 1/4" diameter, 20 per bag
- M990-1620 5/16" diameter, 20 per bag
- M990-1619 3/8" diameter, 20 per bag
- M990-1617 1/2" diameter, 20 per bag

## PROTECTIVE DISCS & SQUARES

### Turnbuttons for 1/16" Glass

Glass and panel retaining buttons. Uses #6 pan head Phillips screws (included). Designed for 1/16" recess of glass or panel. Sold 100 sets per box.

- M908-1003 Brown
- M908-1004 Clear

### Turnbuttons for 3/16" Glass

Glass and panel retaining buttons. Uses #6 pan head Phillips screws (included). Designed for 3/16" recess of glass or panel. Sold 100 sets per box.

- M908-1005 Brown
- M908-1006 Clear

### Felt Discs

Pressure sensitive. Backed with protective cover paper which can be peeled for instant application. Brown. 1/16" thick. 500 per box.

- M940-0101 3/4" diameter
- M940-0102 3/8" diameter

### Felt Squares

Pressure sensitive and backed with protective cover paper which can be peeled for instant application. Brown. 1/2" Square. 500 per box.

M940-0201

### Plastic Discs

Transparent. Permits use on any color furniture or desktop. Made of a clear rubber-like plastic that is practically invisible under glass.

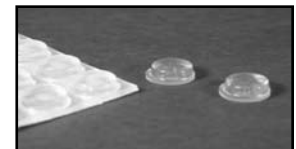

Will not discolor or deteriorate furniture finishes. 3/4" diameter. 100 per box.

- M940-0401 Without adhesive
- M940-0402 With adhesive

### Clear Bumper Discs

Excellent non-skid, high co-efficient of friction. Non-marring and non-staining. Permanently resilient - won't crack or harden. Excellent abrasion resistance, vibration and shock-damping. Use as spacers for cabinet doors, lids, and drawers. Feet on the bottom of cabinetry, clocks, speakers, etc. Bumper Protectors for chairs, walls and sliding doors. Pads and Cushions for fans, small appliances, and furniture. 50 per box.

M940-0404

### Stem Bumpers

Hard plastic stem bumpers. Stems - 1/4" diameter. Surface - 1/2" diameter, 3/16" thick. Pin - .34" long. Sold 100 per box.

- M980-1806 Clear
- M980-1807<sup>∞</sup> Black

<sup>∞</sup> Available while supplies last

## PROTECTIVE GEAR—SAFETY EQUIPMENT

### Gloves

Interlock knit fabric lining absorbs perspiration and insulates against heat and cold. Slips on and off easily. Safe non-slip grip. Pylox coating resists oils, acids, grease, and most industrial chemicals including solvents. Curved fingers with non-slip grip. Medium weight. 10-1/2" length.

M959-3402

### Nitrile Non-Latex Gloves

The Original N-Dex Powder Free is a 100% nitrile, non-latex utility grade glove. The Original N-Dex Powder Free gloves are ambidextrous. 9-1/2" long, 4-mil thick, 100 gloves per box.

M959-3505 Medium  
M959-3504 Extra large

### Craftsman Apron

Neck band and tie strings. Pencil and standard pockets. Imprinted with Mohawk Finishing Products, Inc. Royal blue color. 28" X 36" size. Neck strap: 24"

M959-5502

### Pen Pocket Plus™ Apron

Keeps your touch-up markers at your fingertips. Color selection is always visible. 3 additional pockets to hold other essentials. Carry markers anywhere while keeping your hands free to do the work. 25 1/2" x 23 1/2" size. Neck strap: 24"

M959-5503

### Dust Mask

Lightweight disposable masks for providing respiratory protection during such tasks as lawn mowing, sanding, grinding and insulating. Filters out non-toxic dust, powders, pollen and spray paint. Sold 50/pack.

M959-8561

### Clear Safety Eye Guards

Protects eyes from flying chips and particles. Large lens fits over most personal glasses. Meets ANSI Z87 Safety Eyewear Standards. Lens Color: Clear.

M960-1003

### Respirator Assembly

Professional Series Respirator assembly R7512ES, OV/P95 Medium. Recommended for exposures to organic vapors and mists commonly associated with spray painting, lawn and garden pesticides, staining or refinishing decks and hardwood floors, and many other applications.

M960-6100

### Respirator Filter

Organic Vapor Cartridge/Particulate P95 Filter R6022, consists of 1 pair of organic Vapor Filter 6001 and 2 pair of Organic Vapor Cartridge 5P71, P95.

M960-6101

## SCRATCH AWL

### Scratch Awl

4 inches long.

M946-1008

## SCREWDRIVERS

### "Yankee" Offset Ratchet Screwdriver

- A great alternative to traditional screwdrivers
- Offset head for odd-angle access
- Includes 1/4" Slotted and #2 Phillips blades
- Ratchet handle is reversible on-the-fly
- Provides greater amount of leverage screwdriver
- Ratcheting motion allows swift installation and removal of screws
- Blades are made from hardened tool steel
- Ratchet is made from plated steel
- 3-7/8" overall length

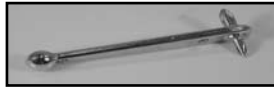

M936-1366

## SCREWDRIVERS

### "Yankee" Phillips Offset Ratchet Screwdriver

- A great alternative to traditional screwdrivers
- Offset head for odd-angle access
- Includes #1 and #2 Phillips blades
- Ratchet handle is reversible on-the-fly
- Provides greater amount of leverage
- Ratcheting motion allows swift installation and removal of screws
- Blades are made from hardened tool steel
- Ratchet is made from plated steel
- 3-7/8" overall length

M936-1367

### Slotted Screwdriver

Carbon steel round shank with yellow molded PVC handle. Mechanics. 6" length.

M936-1368 5/16"

### Phillips Stubby Screwdriver w/ Vinyl Grip

Contractor Grade. For close-quarter driving. Full size vinyl grip handle. Alloy steel blade. Precision machined black oxide tips. #2 point size. 1-1/2" length x 1/4" diameter blade. 3-7/8" overall length.

M936-1369

### Phillips Screwdriver w/ Vinyl Grip

Contractor grade. Full size vinyl grip handle. Alloy steel blade. Precision machined black oxide tip. Chrome plated for corrosion resistance

M936-1370 4" blade length, 1/4" blade diameter, #2 point size, 6-5/16" overall length

### Nut Driver

Magnetic nut driver Isomax screwdriver. Stubby. 1/4" nut setter. 2-1/2" long.

M946-4161

## SHEARS

### Industrial Shears

Bent trimmer shear. High quality. Each blade forged of one piece. Inlaid blades. Black handles. Polished blades. 10" long, 4-3/4" cut. 12 oz.

M945-0427

### Bent Trimmers

Right hand. Contour plastic handles for comfort. "Dura-Sharp" edges. 8" length.

M945-0429

## SHELF SUPPORTS

### Shelf Support, Vinyl Coated Foot

Shelf support for glass shelves with riveted pin and vinyl covered base. 3/4" base, .245 pin. 100 per box.

M930-1783 Brass plated  
M930-1784 Antique copper

### Shelf Support, Sturdy

Shelf support with riveted pin and securing hole. 7/8" base, .245 pin, 3/16" hole. Antique copper finish. 100 per box.

M930-1785

### Shelf Support, Spoon Clip

Spoon clip shelf support. Brass plated. 100 per box.

M930-1786 Fits 1/4" diameter hole  
M930-1787 Fits 5mm diameter hole

### Shelf Support, Fluted-Fits 5mm Hole

Shelf support pins. 1/2" shelf rest. 3/8" long pin fits 5mm diameter hole. 100 per box. 1/2" shelf rest.

M930-1800 1/2" shelf rest. Clear plastic  
M930-1805 1" shelf rest. Clear plastic

## SHELF SUPPORTS

### Shelf Support, Fluted-Fits 1/4" Hole

Shelf support pin. 3/8" long pin fits 1/4" diameter hole. 100 per box.

- M930-1802 1" Shelf rest. Clear plastic  
M930-1803 1/2" shelf rest. Clear plastic

### Shelf Support, Round

1" long, 5mm diameter, 100 per box, nickle finish

M930-1788

## SPRAY EQUIPMENT & ACCESSORIES

### Pressure Unit Spray Tool

No hoses, compressors, or wires. Sprays any thinned liquid. Portable industrial sprayer without the usual encumbrances. Utilizes the same principle as commercial spray guns. Replaceable power pack contains a liquid propellant that will spray up to 30 ounces of paint or other sprayable material. The precision preset spray head assures a perfect spray pattern. Snap on spray head improved to include 3 interchangeable spray heads: Red - Heavy, White - Medium, and Blue - Fine. Ideal for maintenance and production jobs throughout the shop. Extra jars and caps available. Not recommended for waterborne paint.

- M110-0903 4 ounce jar w/ cap  
M110-0904 4 ounce jar w/ cap, 6.5 ounce can, and snap-on spray head.  
M110-0905 6.5 ounce can  
M110-0906 Snap-on spray head

### Spray Heads

Change spray heads on aerosols to customize the spray pattern, or to replace clogged heads.

- M120-0194 Standard Spray Head  
M120-0195 Fine Spray

M120-0200 Medium Spray  
M120-0210 Heavy Spray  
M120-2020 Large Button, Spray Head  
M120-2030 Large Button, Fan Spray  
M120-2040 High Volume Spray Head for Finisher's Glaze Glazing Stain (M114's)  
M120-2050 Spray Head for Perfect Blend™

U.S. orders: (800) 545-0047 Fax: (800) 721-1545

### Power Pack

Make your own aerosol. Versatile-use for stains, lacquers, paints, varnishes, shellac, cleaners, polishes, and epoxy coatings. Power Pack will dispense 16 oz. of liquid with the same fine spray as aerosol cans. For Heavy Spray.

- M110-4950 Power Pack w/ 1 ounce jar  
M110-4949 Power Pack w/ 6 ounce jar

### Power Pack Replacement Bottles w/ Caps

- M110-4952 1 ounce jar w/ cap  
M110-4953 6 ounce jar w/ cap

### Airbrush Propellant

Net weight - 10.6 oz.

- M110-3000  
M870-3662 Airbrush General Nozzle

### Professional Airbrush

Applicator tool for spray applied products. Will accommodate solvent based or water based enamels. May be used with Airbrush Propellant or be attached to a compressor. Video included. Propellant sold separately. Lifetime manufacturer's warranty. Cap adapter not included, 6' hose included.

M870-3001

### Airbrush Siphon Bottle

- M870-3617 28 mm, glass  
M870-3618 33 mm, glass

### Airbrush Air Cap Adapter

M870-3619

### Airbrush Air Hose

10' length. To be used as a replacement hose.

M870-3620

## SPRAY EQUIPMENT & ACCESSORIES

### Pre-Charged Aerosol Cans

Aerosol cans manufactured with propellant to be filled with bulk stain, glaze, toner or clear finish. Labels on cans are blank for you to write on contents. Cans are manufactured for either coatings, toners and solvent or wiping stains and glazes. Great for production line or to spray when a flaw has been noticed after production.

M121-0001 Coatings, Toners, Solvents  
M121-0005 Wiping Stains, Glazes  
M121-0007 Conversion Varnish

### Airbrush Compressor AC500

The new AC500 is the perfect compressor for the person who uses their airbrush all day long. Specially designed for the person who airbrushes for a living, an artist or an avid modeler, the AC500 delivers non-stop performance. The AC500 has an automatic pressure on/off switch, which allows the unit to maintain an even constant pressure, thus eliminating irritating pulsing with spraying fine lines or small details. If you have been looking for a compressor that is both quiet and reliable, then the new AC500 is the compressor for you.

- Pressure regulator with gauge
- Auto pressure shut off
- Airtank with water drain
- 60 PSI (Max)
- 6 CFM @ 20 PSI
- 1/8 Horsepower
- 1/4" NPT Airhose fitting
- Oil-less operation
- Fan Cooled
- 2 year warranty

M870-3050

### Sprayer, Leather Finishing WF 2000S

M870-3051 Sprayer, Leather Finishing WF 2000S  
M870-3052 Bottle W/Cip Cap 2 oz.

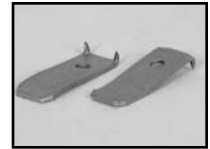

## TABLE HARDWARE

### Nylon Thread

Assorted set-up: white, black, brown, beaver, light honey, red, navy and beige.

M958-0800 8-2 oz tubes

## UPHOLSTERY REPAIR & SUPPLIES

### Nylon Tufting Twine

Super strong quality. Individually boxed.

M958-8623 1/2 lb tubes

### Needle Assortment, 5 Piece w/Case

Assortment of professional utility needles for upholstery repairs. Useful in every shop, but challenging to find through regular suppliers. Made in England. Each case contains: 2 Curved upholstery needles, 1 Special bent needle (for sewing up fowls), 1 awning or canvas needle (excellent for sails), and 1 carpet/heavy material needle.

M927-00K1

### Curved Needle

1/2 Round. 501 Round Point.

M927-5152 2" length

M927-5153 3" length

### Tufting Needle

Time saving hollow upholstery needle with tufting clasp eliminates the need to turn fabric to be tufted. Reduces soiling from repeated handling. Maintains straight seams. Requires less manual effort and fewer stitches. Button tufting also made easier. 12" length.

M927-T606 Tufting Needle

M927-C607 Tufting Clasps

### Compound Tool

Used to push the backing fabric into and under damage. Also used to apply clear L/V Repair Compound over the backing fabric in the damaged area.

M870-9200

### Spring Clip-EK

250 per box.

M956-2447 7/8 x 7/8

### Magnifier

Use to examine and identify grains and damage in leather and vinyl.

M870-9204

### Tacking Strip

Economy 1/2" wide tackless cardboard tacking strip. Approximately 400 yards per platter.

M956-5000

### No. 3 Metal Spring Clip

For fastening edge of wire to spring. To be used with spring clip pliers.

M956-2448 250 per box

### Spring Clip Pliers

A special plier for setting three prong spring or edge wire clips. 7" long. 16 oz. For use with No. 3 Metal Spring Clip.

M956-2445

### Webbing Pliers

Hammer jaw acts as a lever if a strong pull is required. Excellent for stretching fabric and canvas. Can also be used as a hammer.

M956-2500

## WEDGES

### Furniture Wedges

Crooked dresser? Rocky table? Cabinet slanted? Not a problem with the Furniture Wedge! Easy to use, snap-off design has 8 wedge tabs each, ranging from 1/16" to 5/16" thick. 25 per package.

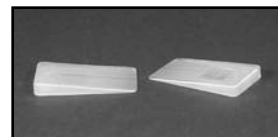

M903-9912

### Wobble Wedges

Interlocking shims perfect for leveling or installing: tables, bookshelves, appliances, cabinets, tubs and sinks, water heaters, flooring and tile, toilets, heating and AC...and much more! 75 per box.

M903-9913

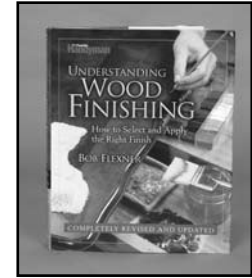

## TRAINING & LITERATURE

### Understanding Wood Finishing by Bob Flexner

Highly recommended for any woodworker, from beginner to advanced.  
In Understanding Wood Finishing, you'll find:

- Tips for getting the perfect finish.
- Tricks for determining what kind of finish you're really buying.
- A handy chart telling which stains are compatible with which finishes.
- Step-by-step finishing schedules.

M900-0004 300 Pages - Soft Cover

## Interactive DVD

### WOOD TOUCH-UP AND REPAIR

The Mohawk Wood Touch-Up and Repair Interactive Training System is designed to teach you the most up-to-date wood touch-up and repair techniques offered in the industry. This interactive DVD will provide you with instructions in: damage analysis, filling of damages, replacing color, grain replacement, spot finish application, sheen adjustment, scratch removal, finish care and much more. Available in Chinese and Spanish. (120 Min)

### LEATHER TOUCH-UP, REPAIR, REFINISHING & MAINTENANCE

The Mohawk Leather Touch-Up, Repair, Refinishing & Maintenance Interactive Training System is designed to show you step by step procedures and techniques for repairing many types of damage and restoring furniture to "good as new" condition. This interactive DVD will provide you with instructions on: filling damage, producing duplicate grain patterns, color matching and application, upholstery repair, spot cleaning and much more. (90 min)

### PROFESSIONAL FINISHING SYSTEM®

The Mohawk Professional Finishing System® Interactive Training System is designed to show you how to produce today's most popular finishes with our new Professional Finishing System® products. By following the steps shown in this interactive DVD, you will be able to confidently recreate the finishes using an assortment of Mohawk's different finishing products. (156 min)

- M900-0010 Wood Touch-Up & Repair
- M900-0020 Leather, Vinyl & Upholstery Repair
- M900-0030 Professional Finishing System®
- M900-0040 Complete Set of the DVD's
- M900-0050 Chinese - Wood Touch-Up & Repair
- M900-0060 Spanish - Wood Touch-Up & Repair

### GUITAR FINISHING

The Interactive Training DVD gives very specific instructions for finishing a guitar with aerosols. It shows the steps necessary for a toned finish, a sunburst effect, and a clear finish using Behlen Vinyl Sealer, Stringed Instrument Lacquer, Starcast Amber Guitar Toner, and Encore Brown Guitar Toner aerosols. Watch as we apply a sunburst to the back and a clear finish to the front of an acoustic guitar. We'll also show you how to sand and rub the lacquer to create a professional high-gloss finish. As an alternative, the DVD could be used to learn how to apply a professional clear finish over just about any stain or coloring technique you desire. Of course, coating the fretboard with Fingerboard Oil is included as well.

You can choose to purchase and view the DVD and then come back for the necessary products, or you can get it FREE when purchasing the Guitar Finishing Kit (M881-2000) in this catalog. The kit includes the products you'll need to apply the finish as shown on the DVD.

M900-0070 Guitar Finishing DVD

## LITERATURE

### Mohawk Catalog

Contains all of the Touch-Up, Repair and Refinishing products Mohawk has to offer, including items to match the needs of the “weekend wood craftsman” in his/her garage to meeting the needs of the wood craftsman on the floor in large factories.

Z120-2043

### Mohawk Color Chart

Color swatches to help you match Mohawk colors to your work projects.

Z115-2391

### Blendal® Stick Color Guide

Shows all colors of the Blendal Sticks™ with information on mixing different colors to create the custom color you need. A Color Theory Wheel is displayed to help you with your color blending.

Z115-3010

### Epoxy Putty Stick Color Guide

Shows our colors of Epoxy Sticks™ and detailed instructions in mixing colors to create the color you need to match your project.

Z115-3000

### Fil-O-Wood™ Color Chart

A sheet displaying all ten Fil-O-Wood™ colors. States some of the many benefits of using Fil-O-Wood™ Putty for all your wood filling needs.

Z115-2334

### Pro-Mark® II Marker Color Chart

A sheet displaying all the Pro-Mark™ II Marker colors. On the back is a list of assortments showing what markers are in each assortment.

Z115-3030

### Leather Color Chart

Color swatches of the Leather Base Coat, Touch-Up Pigment, Leather/Vinyl Markers™, Leather/Vinyl Fil-Sticks™.

Z115-3040

### Professional Finishing System® (PFS) Guide

Provides product information for all PFS products.

Z115-3070

### Quick Fill™ Burn-In Stick Color Guide

Shows all colors of the Quick Fill™ Burn-In Sticks with a helpful step by step photo guide on how to use them.

Z115-3050

### Xpert® Toner Color Guide

Displays a formula guide for mixing the Xpert® Toner Base with the Xpert® Colorants to create custom colors.

Z115-3080

### Waterborne Technical Sell Sheets

These technical sell sheets show our newest waterborne products detailing all of the many benefits of using waterborne products.

#### WATERBORNE PRODUCTS OFFER UNIQUE ADVANTAGES

- GREENGUARD Certified as a waterborne system
- Suitable for LEED® credits: EQ Credit 4.2 Low Emitting Materials - Paints & Coatings

Z116-1000 Waterborne Pre-Catalyzed Lacquer

Z116-1010 Waterborne Dye Stains & Dye Concentrates

Z116-1020 Waterborne Wiping Stains & Glazes

Z116-1030 Waterborne Colorants
