Decorative High-Gloss Surface Solution

Premier EuroCase uses a decorative high-gloss film to produce our Ion panels, doors and drawer fronts. The surface has the stylish appearance of brushed metal with a luxurious high-gloss finish.

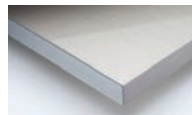

- **Modern Design** – a stunning visual aesthetic is created through the vibrant color, metallic shading and glossy surface.
- **Gloss Percentage** – an 80% gloss level is reflected at a 60° angle using a glossmeter testing instrument.
- **Protective Peel Coat** – no polishing or curing time after removal of protective peel coat where other high-gloss products do.
- **Easy to Clean** – cleaning can be done with a damp microfiber cloth and/or nonabrasive products.
- **PureCore** – made with the finest MDF core material specified for a low surface variance.
- **Cleanroom Environment** – every panel is processed in PUR cleanroom conditions.

Endless Interior Design Options

- **Colors and Edgebanding** – available in five colors with either matching or simulated brushed aluminum edgebanding.
- **Panel Size Options** – standard panel size of 4' x 8' available in either 1/4" or 3/4" thickness. Additional thicknesses available upon request.
- **Double or Single Sided** – double or single sided flat panel doors with several high-quality melamine backer options.
- **Interior Design** – perfect for surfaces such as cabinetry, vanities, furniture, store fixtures and displays.

Company Standards

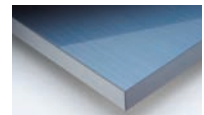

- **Stock and Lead Time** – all materials are stocked on site at our Denver headquarters to quickly and efficiently deliver products at a 10-day lead time.
- **Industry Experience** – nearly 30 years of high-volume panel manufacturing.
- **Automated Warehouse** – modern technology and intelligent process design give us the ability to deliver complete programs of components, fixtures, panels, parts and doors.
- **Process Intelligence** – convergent manufacturing system that guarantees the final product is engineered with precision and quality at an unmatched manufacturing speed.
